

April 27, 2015.

Vancouver City Council Members:

The persons listed below currently reside in the Vancouver area, near the Vancouver Pain Management Society's dispensary located at 2137 Commercial Drive. They are signing today to state their support and need for this dispensary.

They use this company's services regularly and don't believe the hype that it causes more crime or more serious problems with drug users in the area. They also don't think that this dispensary operating on Commercial Drive makes it easier for school aged children and minors to gain access to marijuana edible products. They believe that the dispensary follows guidelines to prevent this from happening. Their experience with this dispensary has been positive and pleasant and they believe that this company has become an integral part of the "Drive's" business community. Being a medical marijuana patient, they need convenient and easy access to their medicine and believe they get that from Vancouver Pain Management Society.

They feel it would negatively impact their life if the city forced them to cease to operate in their current location.
