Hello Council

I wish that the zoning changes for this was for much taller and denser. Vancouver is in a housing crisis, this zoning should be all 50+ story buildings. The zoning is very close to Skytrain. If we are worried about traffic make sure that the buildings do not have parking spots and the residents not be eligible for on street parking passes. I would gladly give up a parking space for an affordable home. Please consider amending the zonings to increase the housing supply and decrease the amount of cars in Vancouver.

Thank you  
Nick Lauga
