Here are my comments for the following Amendments and Rezoning applications being heard on June 13, 2017 –

All these applications do not require this long drawn out process – we are in a critical need for housing in this City, and these applications should be expedited – and provided extra density if they want it.

And further more – none of these applications should have to go through the expensive “rezoning” process – the City should be Zoning areas to accommodate the increase in population in the coming years – I’m not sure when this will start – but the time is now!

I am in full support of all these applications – and would like to see them expedited through the process.

Thanks
