Subject: Rezoning Application for 969 Burrard St and 1019-1045 Nelson St

Dear "City"

Please approve this application as is. Everything about this project is appealing , from design to social benefits. Personally, build taller buildings with interesting design.

Thank you,

Bill Elliott

Mayor and Council
453 West 12th Ave
Vancouver, BC
V5Y1V4

Dear Mayor and Council:

I would like to voice support for the proposal at 969 Burrard Street and 1019-1045 Nelson Street. Specifically, I would like to speak to the community amenity contribution for enhancement to West End community facilities.

I have volunteered for many years supporting community recreation in the West End. The proposed financial contribution to West End amenities of 21 million dollars from this project will make a tremendous difference. This will allow greatly improved community amenities in the West End. Entities such as Joe Fortes Library, West End Seniors Network and West End Community Centre are aging and at capacity and need to be upgraded and improved. This enormous financial contribution is an important placeholder to allow for the renewal of community facilities in the West End.

As the West End population grows it is critical that will plan for the future of these amenities and this meaningful and significant contribution is an important part of that future.

Please support this project and the amenity contributions it provides.

Sincerely,
Ian Haywood-Farmer

Subject: 969 Burrard Street and 1019 – 1045 Nelson Street

Mayor and Council:

I am in support of the Development of the First Baptist Church at Burrard and Nelson as the restoration and seismic upgrading will mean that this building will be restored and made safe.

The affordable housing component will add to the affordable rentals in the West End meaning that all income levels can live in our city.

Yes it would be great to see this beautiful tall building rise or get built. I'm a large fan of architecture. And our downtown is in need of height. Our downtown is getting to look short and flat. We need some height. We can do that and still keep from ruining view of mountains. Every downtown in the world is increasing there downtown height. Look at our west coast. La. San Francisco. And so on. And you have to look at our future with population growth. Not just building s for residential buildings but also for business. We can't go wider but in some area higher. Also with shading every time a building is built that is taller than another there will be some shading at certain times of the day . that's only normal. Please looking up is always positive thank you .

Part 2 of letter. This building will be beautiful to it's full height when completed or if. I understand our downtown can only go so high in height. We are a high rise city. Buildings up to 649 feet in height. But when we have buildings that are proposed. They should be different and beautiful. Architects from around the world. So when people came and visit our downtown, it will be like a giant museum of architecture. When I'm driving my car on Georgia. And i see trump tower on one side and the Shangri-la tower on the other. Its such a beautiful sight. Tall and beautiful. Need more at or close to these heights. Thank you for your time.

Subject: THUMBS UP FOR THIS PROJECT - FIRST BAPTIST CHURCH TOWER!

Hi City of Vancouver,

Please approve this project as there is a tremendous support for its design and height. Just to let you know that people I talk to all support the project although we are not vocal like the minority who are against it. Vancouver is already seeing a decline in condo construction. Please do not let the suburb steal all our towers of tomorrow. Thanks.

Best regards,
Vincent Gan, E.I.T.

Subject: First Baptist Church Redevelopment Support

Hello

I am just sending an e-mail voicing my support of the First Baptist Church tower proposal.

Please do not alter the design or reduce the height.

It is a beautiful looking proposal and will bring some much needed visual interest to the Vancouver skyline viewed from afar and from within the city core itself.

Having been born and raised in Vancouver I have never been this excited regarding a tower development in the city and I would be greatly disheartened to see it reduced in scale and quality.

Thank you very much

Ian Ius
