This and other projects like it fly in the face of everything that mayor space cadet and the vision dictatorship at city hall supposedly hold near and dear to their hearts. Mr Robertson is always snivelling and crying about more money for transit. What should we do? Add more load to bus route #20 which is already extremely busy. (Just like the Cambie corridor) He also claims to be the "green" mayor. These projects cause a lot of noise pollution and extra car emissions because there will invariably be lane closures. The vision dictatorship claims to be concerned about traffic congestion. What should we do? Of course - build more housing to bring more people into the city and INCREASE TRAFFIC CONGESTION. Furthermore why can't the vision dictatorship at city hall just leave east vancouver alone? How many councillors could find the location of this project on a map? How many know (or care) about all the extra traffic it will create?
It's sickening.
