To whom it may concern,

Re: 58 West Hastings Development

As a City of Vancouver resident and board director of 58 West Hastings, I strongly support the above development.

The project will address the critical needs of the community, and will be a great community asset and mechanism to improve the homelessness, poverty, and health conditions of the DTES, especially through the project's Vancouver Coastal Health component and provision of social housing.

Sincerely,

"s.22(1) Personal and Confidential)"

Subject: 58 West Hastings

Dear City of Vancouver

My name is Mary Anne Davidson. I am a resident of Coal Harbour living in the Shaw Tower. I am very involved in the Chinatown and Downtown East Side through the Bloom Group and through my involvement with the Chinatown Foundation.

I support the project proposed for 58 West Hastings. I believe this development should provide affordable housing as proposed with a mixture of income based and social housing.

I have heard some people ask for the project to focus on social assistance tenants only. I believe that a single purpose development perpetuates a segregated community. There are people who live and work in the DTES and Chinatown that have very limited options for Housing. The proposed development offers a real solution to a mix of individuals and will be a model for integration.

I support this project.
