Subject: Re: notice of public hearing: 5679 Main Street proposal of market rental housing

are there going to be enough parking spaces for all the 46 market rental housing units and also commercial customers in this development? as we are residents one block away who are already affected by parking issues of nearby businesses and secondary suites tenants and also laneway housing tenants. the streets near 5679 Main Street and 41st Avenue are already affected by parking issues due to main suite residents and secondary suites residents and also the increase in laneway housing residents too. to council, please consider the developer has sufficient underground parking spaces for the new building market rental housing units and their commercial business customers. thank you for your consideration.
