ALL ABOUT NEWSPRINT

In our region, about 67 percent of the newsprint we all use is being recycled. Almost all of the newsprint that's being recycled goes to the huge Newstech de-inking facility out in Coquitlam to be turned back into newsprint pulp.

Per person, we recycle about 43 kilograms of newsprint per year. That still leaves about 21 kilograms of newsprint per person going in the garbage, so please make good use of this blue bag.

If you need another blue or yellow bag, please call the number in the upper right hand corner. When you set out the blue and yellow bags, lay the bags on their sides to keep the rain off the paper.

This Bag Sponsored by the Vancouver Courier
