This digital copy of a letter addressed to Mayor and Council and received on 2012 December 10th is forwarded for your action and/or information.

Residents who strongly oppose to the opening entrance on W. 32nd and Willow St. and the installation of the traffic light on W. 33rd and Willow Street. Any new development in the neighbourhood should not add further impact to the already severe traffic congestion on Willow St. and along W. 33rd Ave. Traffic due to Eric Hamber Secondary School (1300 students) and École Rose-Des-Vents Elementary and Secondary School (600 students) is a long time safety concern for residents and school parents. W. 37th and Willow St. is also a bikeway and W.35th and Willow St. has a children's playground.

32nd and Willow St. is a section that students and cyclists frequently use as a short cut to go through the hospital and access to the north side towards King Edward Street area. Over a hundred students pass through this section between 8:15-8:35 am and after school. These students walk, cycle, skateboard, and rollerblade, and often travel in small groups. These teenagers spread out on the streets and do not stay on the sidewalks. Building a new entrance for vehicles to go in and out and to share the same road with these students and other cyclists pose a very high risk and create a very unsafe environment.

Residents who strongly oppose to the opening entrance on W. 32nd and Willow St. and the installation of the traffic light on W. 33rd and Willow St. Any new development in the neighbourhood should not add further impact to the already severe traffic congestion on Willow St. and along W. 33rd Ave. Traffic due to Eric Hamber Secondary School (1300 students) and École Rose-Des-Vents Elementary and Secondary School (600 students) is a long time safety concern for residents.
