0 units at welfare and pension rates is unacceptable.
How much are the rates

Social mix – revitalization = code words for gentrification. To soften a fact of displacement and furthering marginalization of people who have been in this neighborhood for a very long time – that would be the low income community whos massively long history in the neighborhood of Vancouver is the foundation of Vancouver. This city is is becoming increasingly unaffordable and we all know that.

Private business space on the ground floor – that is the recommendation from the low income communities concerns about gentrification – the business space will be a certain way? Are the ground floor businesses going to exclude the low income community?

The DTES LAPP concerns are not being addressed well. Gentrification and displacement are accelerating at an alarming rate. Rate of change needs to be investigated by the DTES LAPP.
