To: City of Vancouver, City Clerk's Office

Good afternoon,

I am writing to you today to give my support for the rezoning to CD1 of the Point Grey Hospital because the area absolutely needs more beds for seniors who need long term assistance. Moreover, from the information I have read on the 'kits place' web site, the building would respect the height and size of what is already being built in the neighbourhood. From what I can see, it does not look like it would block the views since it would still be a low rise.

One of my family members has been a resident of this hospital for the last several years and it is so convenient for the family living close by to make regular visits.

The comment about not having the 38 parking stalls as required as far as I can see is not a huge concern since there are excellent public transportation options in the area. What is more of a shame is that if not more beds are built for the sick and elderly, their own families and friends would have to find other elderly homes outside of the city and visitors would have to travel great distances to the suburbs to see their loved ones.

Please approve this zoning since we will need more and more beds for our aging population.

Best Regards,

Ann

Mayor & Council,

Please consider this email my support for the Point Grey private hospital and Casa Mia applications. With two young children I am unfortunately not able to attend the public hearing.

Many thanks,

Sam Hooge
