To Mayor and Council,

I am writing in regards to the development on Main and 49. Anything more than 3 stories high is just too much. Since Langara College has been expanding we already have lots of problems with parking and traffic congestion both on our streets and lanes. The shops in our area have also been suffering in last few years due to lack of parking for the customers. Our household along with all of our neighbors strongly oppose this project.

To Mayor and Council...I am writing regarding the above mentioned proposal on Main st. My family strongly opposes the development of 6 story buildings in this residential area. This is a family oriented area with majority of families with children who attend the close by education facilities i.e. Preschool, elementary, high school and college. There are already so many problems in our area concerning parking due to limited college parking for the students and even less parking on main because of the local shops. This should not be an area where it should be suited to have a project of this sort . We have already seen since such a huge difference in occurrences and late night happenings due to the weed shop that has come into our neighbourhood last year. This has always been a family oriented neighbourhood and it would be very difficult to keep it one with the proposed development. This project is way too big for this area the city has areas where there are more suited for a project of this sort. Please take this matter into serious consideration as it will cause a lot of problems for home owners who pay a lot of property tax as compared to affordable housing owners. This will also depreciate the vast interest this area does have for home buyers with families. This will no longer be a well sought out area for families and with the already high traffic area it being due to the college more traffic will just put off current home owners.
