Hello,

I am writing in support of the rezoning hearings for 512 West King Edward.

Vancouver is a beautiful city but there is not enough affordable housing in this city. I would be extremely happy to rent an apartment on 512 West King Edward so that I could continue to live in the neighbourhood I grew up in—and not have to spend hours commuting in and out of the city and putting all of my earnings towards the rent with nothing left over. Students and young couples would greatly benefit in having apartments with affordable rent in this area—instead of living in overpriced basement suites.

As a recent graduate, my options are continuing to live at home with my parents or move out as far as Abbotsford. Well thought out apartments and housing that will be built with care and consideration is what the city—and the people of your city deserve, we work hard to live here but it seems like the city doesn't want us too. I know many people in the same situation and it would be a shame to not support this project.

I would very much like to be added to the mailing list once the building is ready to receive applications as I want to be the first to show support and live in a building I know was built for the people of Vancouver.

Thank you,

Sarah Rainey

Dear Mr. Mayor and Council,

I am in full support of the rezoning of 512 West King Edward Ave rental building. I live in this neighbourhood and I have seen many changes happening in the Cambie corridor. I enjoy taking the transit to work and very grateful for this opportunity. Although I own my house in the Cambie corridor, I do know many that don't and that wish to rent in this beautiful neighbourhood. Many of whom are full time professional couples that simply can't afford to buy homes. What attracted me to this particular rezoning is the fact that it has a lot more windows in it and it looked very well done. The roof top garden is a good feature to have. I haven't seen many of those around. I think this building should be rezoned and hopefully build. I am not worried about the lack of the parking space because people that chose to rent and live close to transits are often the ones that don't own cars.

I missed the open house for this application and unfortunately can't make it to the public hearing. I would like to thank the architect behind this project.

Thank you  
Kate

This email is to provide my support for the proposed residential rental building at 512 W. King Edward Ave.

I like the modern exterior design. It will be a welcome addition and improvement to the intersection at King Edward and Cambie.

Yours sincerely,

Barry Garfield

I attended the open house held earlier in the year & I liked what I saw. This property is unique in the area (Cambie Corridor) given the fact that it is going to contain only rental units - something so sorely needed in Vancouver. It is right across from the skytrain station and bus stops which will be very convenient for the renters. It is my belief that the approval process for this project should be fast tracked so that these rental units will be available to the public sooner than later.

Thank you for giving the public a venue to voice their opinions.
