**Subject:** Public hearing re 8615 Laurel street

I live in the building right next to the proposed new development and I'm concerned about the lack of parking in the neighborhood. This new development will have 65 suites but only 35 underground parking spaces? This means there will be even less street parking available where parking is already tight. I understand city council is all for most everyone riding bikes instead of driving cars but having 87 bike spaces is just not reality for this neighborhood where practically no one rides a bike. I urge you to rethink and increase the number of parking spaces and decrease the bike spaces, which would be a whole lot more realistic and practical for this neighborhood.

Regards, E. Edel
