

Save Our Skyline YVR Petition

To City of Vancouver Mayor and Council, Premier of BC, Minister and Deputy Minister of Tourism, Arts and Culture responsible for crown corporation PavCo, and CEO of PavCo:

The City of Vancouver is unique in the world in that “view corridors” were established to protect views that would otherwise be threatened by future development. Since 1989, the City has protected 27 “corridors” so that views of the North Shore mountains, the Downtown skyline, and the surrounding water can be seen and enjoyed by the public at important vantage points in the City of Vancouver. These “view corridors” provide an important free accessible public amenity for everyone, locals and tourists, regardless of income. Other cities referencing this policy and implementing similar ones demonstrates the success of this policy in providing a benefit.

Three Northeast False Creek Plan tower proposals will substantially block public views of the mountains in three important view corridors. Our public mountain views will be sold off to upper scale condo owners. While heights of 300 feet are the limit to protect these view cones, the developers PavCo and Concord Pacific are proposing three buildings at the corners of Georgia Street and Pacific Boulevard, which will privatize these highly valued free public views for unaffordable multimillion condos. The City’s rationale is proposing a “gateway” be made of three towers, but these gateways cannot be viewed by anyone at the ground-level. These towers will only stand to privatize public views. The Pavco tower will be 400 feet (40 storeys) and the two from Concord will be 425 feet (42 storeys). These towers will eliminate key public views of the mountains from Cambie Street between 10th Avenue and 12th Avenue, and will also take away an iconic north shore mountain view seen from the Queen Elizabeth Park viewing platform.

For the PavCo tower, there is currently another alternative proposed that does not impact the view corridors. The recommended zoning and the draft Design Guidelines from the City allow for a lower floor plate tower that will be 300 feet in height, provide a better street form, and will not corrupt the view corridors. This form is a better alternative though the bulk proposed is still a form that follows finance. For the Concord Pacific towers, alternatives that do not penetrate the view corridors must be proposed.

This petition asks the City to reject the Georgia Street and Pacific Boulevard towers from PavCo and Concord, which will privatize views that are a public amenity. This petition asks the City to accept the recommended zoning and draft guidelines for the PavCo tower to a limit of a 300 foot height, which will also preserve these priceless public views for future generations to enjoy, and create a street form that has a stronger street presence and reference to the surrounding area.
