Hello Council

- 1) Considering Vancouver is in a housing crisis. Why are these rezonings so incremental and small. We should be rezoning to 50 plus stories with profits from half the floors being used to subsidize the other floors.
- 2) Considering we are in a climate emergency why are we approving more car parking spots or city parking spots. Change the regulations so that all new buildings do not include car parking spots or car parking permits:

Thank you Nick Lauga
