

Neighbours are against this wrongheaded development

Although there is unanimous approval for more housing, the projects at 3600 and 3680 E Hastings are not viable or logical for that neighbourhood.

These TWO 14 STOREY TOWERS on the corner of Hastings and Boundary are over-sized for the Hastings corridor, and well over-density for the available transportation services (very small bus loop, no skytrain).

Hours-long traffic jams in all directions are the norm NOW, and will only get worse, during and after construction adding to Bridge and PNE traffic Jams!

This ill advised project will forever change the skyline view, and will overstress the small Bus Loop (since only HALF of the units will have available parking), also overstressing already tight parking for locals on Hastings and side streets. Five storey buildings with one parking for each unit would be a very workable plan and is requested.

This will drastically and negatively affect the neighborhood for years to come.
