### Request Details

- 1. Subject (address if applicable):**  
mendments to the Zoning and Development By-law to Increase Social Housing in the RM-4 and RM-3A Zoning Districts
- 2. Position:**  
Support
- 3. Comments:**  
The City needs more low cost housing. The zoning process puts a brake on building that, and gives unearned weight to the voice of people who already live in the neighbourhood as against all the people who would benefit from the housing. This amendment is a sensible, modest proposal to start filling the gap of our housing shortage. I support it.

**3. Comments:**

I previously was "unsure" of whether I supported this motion due to complexities over how social housing was being defined. But after listening to the speakers and learning more about this motion, I support it in its current form. We absolutely need to make building affordable and social housing a priority and this motion would be a good first step but I would like to see it go much further towards added density given the scale of need. The current zoning system disproportionately benefits existing forms of housing which are clearly not adequate to meet the housing crisis. This proposal would be a first step towards changing that system so that it benefits a wider variety of residents and needs.
