06/21/2022	15:07	PH2 - 2. CD-1 Rezoning: 1332 Thurlow Street and 1065 Harwood Street	Other	<p>The two 30+ story towers under review in this public hearing are in addition to 3 other rezoning applications that have appeared within one block of my home at 1020 Harwood St., which are: #1 at 1055 Harwood St., #2 at 1280 Thurlow and 1068 and 1090 Burnaby St. and #3 at 1045 Burnaby St. My primary concern is reasonable access to my home during any and all construction, both on foot using even passable sidewalks and by vehicle, able to access my building parkade off Jung Lane between Burrard and Thurlow St.s. Vehicle access to my home is currently limited to south bound on Burrard from Harwood St., Maxine Lane or Burnaby St. or south bound on Thurlow from Burnaby, Maxine Lane, Harwood or Jung lane. All of these access routes w ll be impacted by these construction sites. How is the city planning on managing traffic flow while these construction sites are active' From what I've seen elsewhere in the city, my expectations are low, but my need for better in my home area is high. An additional I have grave concerns about pedestrian safety and crossing Thurlow at Burnaby and at Harwood. Despite repeated calls to City Hall using the 311, no action whatsoever has been taken to mark crosswalks at these intersections. Vehicles come pelting down Thurlow as if it they were in a rally race, many speeding downhill towards Pacific Street, very few stopping for pedestrians. How can I feel confident that pedestrian foot travel will be better during construction.</p>	Michael Connidis	s22(1) Personal and Confidential	West End	No web attachments.
