

## COUNCIL REPORT

Report Date: January 31, 2023  
Contact: Colin Knight  
Contact No.: 604.873.7569  
RTS No.: 15497  
VanRIMS No.: 08-2000-20  
Meeting Date: February 14, 2023  
[Submit comments to Council](#)

TO: Vancouver City Council  
FROM: Director of Finance  
SUBJECT: Quarterly Capital Budget Adjustments and Closeouts

### Recommendations

- A. THAT Council approve capital budget and funding adjustments as outlined in this report and Appendix D, which will result in:
  - a. an increase of \$0.32 million to the 2023-2026 Capital Plan; and
  - b. an increase of \$12.2 million to the Multi-Year Capital Project Budgets.
- B. THAT, as part of the Capital Budget closeout process, Council approve the closeout of one capital project that was completed with deficit exceeding \$0.2 million, as outlined in this report.

### Purpose and Executive Summary

As part of the City's Capital Budget process, Council considers Capital Budget adjustments on a quarterly basis. This streamlines the Capital Budget process and reduces the number of standalone capital budget related reports submitted to Council for approval of capital funding and expenditures. The budget adjustments included in this report are limited to addressing new and emerging project requests (health and safety risk), increase in project scope and cost estimates, and utilization of additional external and development funding received that were not known at the time of the approval of the 2023 Capital Budget.

This report proposes an increase of \$0.32 million to the 2023-2026 Capital Plan and a net increase of \$12.2 million to the Multi-Year Capital Project Budgets to fund new or increased project budgets. The current total approved Multi-Year Capital Project Budgets for all open projects is \$3.1 billion.

For projects completed in the fourth quarter of 2022 for a total of \$39.3 million, only one project was closed out with a deficit exceeding \$0.2 million.

## **Council Authority/Previous Decisions**

The 2023-2026 Capital Plan was approved by Council in July 2022. The plan presents a comprehensive overview of planned City capital investments in infrastructure and amenities across various service categories, along with the associated funding strategy and debt capacity for the capital investment priorities over the four years. The Council approved the 2023 Capital Budget (funding allocation from 2023-26 Capital Plan) on December 6<sup>th</sup> 2022.

In accordance with the City's Capital Budget Policy, proposed adjustments to the Capital Plan and the Capital Budgets and proposed closeouts of completed projects with surpluses or deficits greater than \$200,000 are presented to Council for approval.

## **City Manager's Comments**

The City Manager concurs with the foregoing recommendations.

## **Context and Background**

Capital budget adjustments are recommended throughout the year to reflect new external funding, progression of projects through planning, design, and construction phases, and reallocations of project budgets based on current cost estimates.

Appendix A lists the different circumstances where Council approval is required in accordance with City's Capital Budget Policy.

## **Discussion**

### **Capital Plan Summary**

The 2019-2022 Capital Plan currently stands at \$2.9 billion with \$2.3 billion of city-led capital programs and \$0.6 billion as in-kind projects. Out of the \$2.3 billion city-led Capital Plan funding, \$2.2 billion has been allocated to multi-year projects in progress. Unallocated funding capacity from the 2019-2022 plan has been incorporated into the funding assumptions for the 2023-2026 Capital Plan. This report represents the final budget allocations from the 2019-2022 Capital Plan, with any future budget allocations to be funded from the 2023-2026 Capital Plan.

Appendix B provides an overview of the 2019-2022 Capital Plan, subsequent to adjustments proposed in this report.

The 2023-2026 Capital Plan currently stands at \$3.5 billion with \$2.8 billion of city-led capital programs and \$0.7 billion as in-kind projects. Out of the \$2.8 billion city-led Capital Plan funding, \$0.6 billion has been allocated to approved multi-year project budgets. Appendix C provides an overview of the 2023-2026 Capital Plan, subsequent to adjustments proposed in this report.

### **Highlights of proposed major budget adjustments**

#### ***1. Revised Cost Estimates***

The adjustments below will increase the multi-year budgets in line with revised cost estimates largely driven by increase in scope and cost escalations. These cost escalations are driven by higher prices to procure materials, higher shipping and transportation costs due to escalated fuel prices, unforeseen labor and sub-trades shortage due to ongoing supply chain issues.

**1. a. HydroVac Facility Implementation**

*(No change to the Capital Plan; Increase to Multi-Year Project Budget: \$2.5 million)*

The HydroVac Facility Implementation project was originally approved to store the HydroVac trucks used in Sewer Operations in Manitoba Yards. The original scope included renovation and upgrades to the existing facility. However, during the design phase it was proposed that due to the current soil and building conditions being worse than anticipated, a new facility is required. As a result, the cost estimate increased from \$1.5 million to \$4.0 million and the incremental impact would be funded through reallocation of existing project budget from the 2022 Sewer Main Renewal program.

**1. b. Replacement of the Vancouver Police Department Boat**

*(Increase to the 2019-2022 Capital Plan and Increase to Multi-Year Project Budget: \$0.58 million)*

This adjustment request is to facilitate procurement of the replacement of the Vancouver Police Department boat which is at end-of-life. The new boat will have a higher engine capacity and includes upgraded equipment to support enhanced performance. The current boat has a replacement value of \$0.7 million, whereas the new boat has a cost estimate of \$1.8 million. The incremental impact would be funded through the salvage value of the current boat (already included in the current multi-year project budget) and a grant received from the Vancouver Police Foundation. There is an additional operating budget impact of \$0.1M that has been included in the Vancouver Police Board approved provisional 2023 budget. This funding is currently not part of the City of Vancouver Draft Current State budget. On approval of this capital budget adjustment, the operating impacts would need to be built into the updated 2023 Operating budget for council consideration or unless directed otherwise by Council.

**1. c. Coal Harbour School**

*(Increase to the 2019-2022 Capital Plan and Increase to Multi-Year Project Budget: \$3.3 million)*

This adjustment is due to revised cost estimates for the Coal Harbour school project because of higher tender prices and increase in project work, including additional interior millwork, excavation costs, revisions to elevator shaft dimensions, fuel tank addition to emergency generator, etc. The project is being delivered in partnership with Vancouver School Board and the additional budget request of \$3.3 million would be funded through new funding received from the Vancouver School Board.

**2. New and Emerging Projects**

The adjustments below will create new multi-year project budgets to address emerging needs.

**2. a. Evans Yard Dust Extraction System Replacement**

*(No change to the Capital Plan; Increase to Multi-Year Project Budget: \$1.24 million)*

This budget adjustment request is to support an emerging need to replace the dust extraction system at Evans Yard, which is currently operating at 50% capacity. The current system does not meet the health and safety standards and poses a health and safety risk for staff. The cost estimate for the new dust system is \$1.24 million and it will be funded through reallocation of existing project budgets from the 2019-2022 Capital Maintenance programs (cost savings and scope deferrals).

**2. b. False Creek Flood Protection Studies**

*(No change to the Capital Plan; Increase to Multi-Year Project Budget: \$0.25 million)*

This adjustment request is to create a new project to initiate a cost-benefit analysis investigating the feasibility and long-term impacts of flood mitigation concepts in False Creek. The outputs of this work will inform flood protection and other climate adaptation infrastructure investments along the seawall. The project will be funded through the funding earmarked in the 2023-2026 Capital Plan for emerging climate adaptation priorities.

**2. c. 2023-2026 Washroom Renewal program**

*(No change to the Capital Plan; New Multi-Year Project Budget: \$0.2 million)*

This adjustment request is to create a new project to facilitate the design of the renovation of the washroom/fieldhouse located at the Strathcona and Kerrisdale Parks. Once the design phase of the project is completed, Council approval will be requested in the future to progress to the construction phase. The project will be funded from the 2023-2026 Capital Plan.

**3. New Development Funding & External Revenues**

The adjustments below will increase the Capital Plan and the Multi-year Capital Project Budget in line with the receipt of new funding.

**3. a. Water & Sewer Connections**

*(Increase to 2019-22 Capital Plan and increase to Multi-Year Project Budget: \$2.7 million)*

This budget adjustment request is to increase the Multi-Year Capital Project Budget and the 2019-2022 Capital Plan for various water and sewer connection programs. This adjustment reflects revenues, from development work, collected during the period. These revenues are driven by residential & commercial construction.

**3. b. Teaching Garden at VanDusen Garden**

*(Increase to 2023-26 Capital Plan and Increase to Multi-Year Project Budget: \$0.22 million)*

This adjustment request is to create a new project for a new teaching garden at the VanDusen Garden. The VanDusen Botanical Garden Association will program, manage and run classes in the garden. The project will be funded through funding received from the VanDusen Botanical Garden Association.

**4. Administrative**

The adjustments below include either consolidations of project/program budgets to allow better project management and cost tracking, or other administrative adjustments that change the multi-year capital project budget.

**4. a. 2015-18 Combined and Commercial Sewer Connections**

*(No change to the Capital Plan; Increase to Multi-Year Project Budget: \$5.8 million)*

The adjustment request is to address the budget deficit in the 2015-18 Connection programs by \$5.8 million and subsequently close out the programs from the prior plans. The revenues collected at the time of connection application were less than the material and labor costs incurred. The deficit would be funded through additional connection fees through subsequent fee increases and from Sewer Debenture in the "Citywide Unallocated from Closeouts" account.

**Appendix D** provides details on all the Multi-Year Capital Project Budgets adjustments recommended in this report.

### **Capital Closeouts**

As per the Capital Budget Policy, proposed closeouts of completed projects with surpluses or deficits greater than \$0.2 million are presented to Council for approval.

A total of 28 projects/programs with Multi-Year Capital Project Budgets totalling \$39.3 million were closed in the fourth quarter of 2022. One project was closed with a deficit greater than \$0.2 million.

a. Vancouver Transfer Station (VSTS) Structural Repairs

The project closed out with a deficit as a result of higher than expected cracked areas and corroded electrical conduits repairs which led to higher costs in VSTS transfer station structural repairs project. This deficit is planned to be funded out of cost savings from the Upgrade Existing Compost Facility - Vancouver Landfill project, which has been successfully completed under budget.

**Appendix E** provides for Council information a summary of capital projects closed in the fourth quarter of 2022 that are funded from voter-approved capital funding.

### **Financial Implications**

This report proposes an increase of \$0.32 million to the 2023-2026 Capital Plan and a net increase of \$12.2 million to the Multi-Year Capital Project Budgets.

The current total approved Multi-Year Capital Project Budgets for all open projects is \$3.1 billion and this report proposes an increase of \$12.2 million for new or increased capital projects budgets. For projects completed in the fourth quarter of 2022 for a total of \$39.3 million, only one project was closed out with a deficit exceeding \$0.2 million.

### **Legal Implications**

There are no legal implications associated with this report's recommendations.

\* \* \* \* \*

## **APPENDIX A**

### **Capital Budget Process and Capital Budget Policy**

The City's capital planning framework consists on two forward-looking planning tools: a longer-term 10-year Capital Strategic Outlook and a medium-term 4-year Capital Plan, which then gets implemented via the Capital Budget Process. The level of specificity related to project details (scope of work, schedule, cost estimate, and funding) increases from the Capital Plan to the Capital Budget. The Capital Budget is the primary tool by which the City implements its multi-year Capital Plan. It provides the authority to proceed with specific capital programs and projects, and defines the multi-year capital project budgets and outcomes, as well as a corresponding annual expenditure budget to manage the timely delivery of these outcomes.

In accordance with the City's Capital Budget Policy, Council approval is required for:

- new capital projects and corresponding multi-year capital project budgets
- additions to the Capital Plan
- increases to existing multi-year capital project budgets with funding from the Capital Plan
- increases to existing multi-year capital project budgets with funding to be added to the Capital Plan
- changes in funding sources for existing multi-year capital project budgets
- funding reallocations greater than \$500,000 between existing open multi-year capital project budgets
- increases to the total Citywide Annual Capital Expenditure Budget
- closeouts of completed capital projects with a deficit or surplus greater than \$200,000.

As part of the City's Capital Budget process, Council considers Capital Budget adjustments on a quarterly basis. This streamlines the Capital Budget process and reduces the number of capital budget related reports submitted to Council for approval of capital funding and expenditures.

Following are some of the circumstances for which adjustments to Capital Budget are required and brought forward through quarterly budget adjustment process:

- new or external funding is received for existing or new scope of work after the capital budget has been set through annual capital budget process;
- additional capital budget required due to projects experiencing cost escalation identified during the procurement process;
- project budget required to initiate procurement process to meet overall project timelines;
- large-scale projects advancing to subsequent phases with current scope and budget only including current project phase;
- alignment of the project budgets with the revised project scope as approved by the different city executive committees;
- other administrative reasons, including swap of funding sources of a project, separating projects/programs in two different projects for better cost tracking and project management, etc.

For more details on the Capital Budget process, please find the City's approved Capital Budget Policy. ([Capital Budget Policy](#))

The funding was provisionally held for the deductible of an insurance claim for the repairs at Kitsilano Pool (damages arising from storm/king tide). However, cost of the Kitsilano Pool repairs was less than the deductible amount.	1,801,000	(200,000)	1,601,000	2019-22 debenture 2a		
Total - New Initiatives						\$ 14,644,000	\$ 770,000	\$ 15,414,000		\$ -	\$ 320,000

## APPENDIX D

### Capital Adjustments Summary – Multi Year Project Budget (contd)

Appendix D - Capital Budget Adjustment Requests						BUDGET IMPACT					
						Multi-Year Project Budget					
B. Budget increases / decreases to existing projects and programs											
Programs/projects where costs or expenditure timing has increased/decreased due to unforeseen changes in market economic conditions or unavoidable changes in project scope; increases in scope afforded by external funding contribution opportunities											
Impact on Capital Plan	2023-2026 Capital Plan Service Category / Sub-Category		WBS	Project Name	Reason for Adjustment	Current	Change	Proposed	Funding Source(s) for Changes to Multi-Year Project Budget	Addition to 2019-2022 Capital Plan	Addition to 2023-2026 Capital Plan
Addition to 2019-2022 Capital Plan	06. Public Safety	B. Police	CEQ-00033	2019-22 Fleet-Vancouver Police Department (2019-22)	<b>Increase to Multi-Year Project Budget and 2019-2022 Capital Plan:</b> This budget adjustment request is to facilitate procurement for the replacement of an existing end-of-life Vancouver Police Department boat. The cost estimate for the new boat is higher than the current boat due to higher engine capacity and upgraded equipment to support an enhanced performance. The new boat will be partly funded through the salvage value of the current boat and a grant recieved from the Vancouver Police Foundation.	18,710,000	575,000	19,285,000	External - Police Foundation	575,000	
Addition to 2019-2022 Capital Plan	09. Water, sewers & drainage	B. Rainwater & sanitary water	CEW-00123	2022 Water Commercial Connections (2019-22)	<b>Increase to Multi-Year Project Budget and 2019-2022 Capital Plan:</b> This budget adjustment request is to increase the Multi-Year Capital Project Budget for the 2022 Water Commercial Connections program to reflect revenues, from development work, collected during the period. These revenues are driven by commercial construction.	4,492,000	859,000	5,351,000	Connection Fees (Sewerage & Drainage)	859,000	
Addition to 2019-2022 Capital Plan	09. Water, sewers & drainage	B. Rainwater & sanitary water	CEC-00028	2022 Sewer & Water Combined Connections (2019-22)	<b>Increase to Multi-Year Project Budget and 2019-2022 Capital Plan:</b> This budget adjustment request is to increase the Multi-Year Capital Project Budget for the 2022 Sewer and Water Combined Connections program to reflect revenues, from development work, collected during the period. These revenues are driven by residential and commercial construction.	11,439,000	1,813,000	13,252,000	Connection Fees (Sewerage & Drainage)	1,813,000	
No impact (Reallocation of previously approved Capital Budget)	09. Water, sewers & drainage	B. Rainwater & sanitary water	CEC-00023	2017 Sewer & Water Combined Connections (Capital) (2015-18)	<b>Increase to Multi-Year Project Budget:</b>  The adjustment request is to increase the budget for the 2015-18 Connection programs by \$5.8 million to account for a budget deficit in these programs. The revenues collected from the development work is less than the material and labor costs which were higher than originally anticipated thus causing the budget deficit.  The deficit would be partly funded through the additional connection fees received and remaining from unallocated Sewer Debenture accumulated through prior project closeout surpluses.	11,178,387	1,094,363	12,272,750	Connection Fees (Sewerage & Drainage) \$841,363  Citywide Unallocated from Closeout Surpluses (2015-18 Sewer Debenture) \$253,000		
No impact (Reallocation of previously approved Capital Budget)	09. Water, sewers & drainage	B. Rainwater & sanitary water	NEC-00005	2017 Sewer & Water Combined Connection (Non-Capital) (2015-18)		-	1,350,750	1,350,750	Connection Fees (Sewerage & Drainage) \$214,750  Citywide Unallocated from Closeout Surpluses (2015-18 Sewer Debenture) \$1,136,000		
No impact (Reallocation of previously approved Capital Budget)	09. Water, sewers & drainage	B. Rainwater & sanitary water	CES-00053	2015-18 Sewer Commercial Connections (2015-18)		6,700,000	3,336,952	10,036,952	Connection Fees (Sewerage & Drainage) \$2,549,952  Citywide Unallocated from Closeout Surpluses (2015-18 Sewer Debenture) \$787,000		
Addition to 2019-2022 Capital Plan	05. Community facilities	E. School	CNS-00086	Coal Harbour School (2019-22)	<b>Increase to Multi-Year Project Budget and 2019-2022 Capital Plan:</b> This budget adjustment request is to increase the budget for the Coal Harbour school project. The increase in budget is due to higher tender prices, and increase in project work (including additional interior millwork, excavation costs, revisions to elevator shaft dimensions, fuel tank addition to emergency generator, etc.).	31,655,000	3,299,000	34,954,000	External - Vancouver School Board	3,299,000	

## APPENDIX D

### Capital Adjustments Summary – Multi Year Project Budget (contd)

Appendix D - Capital Budget Adjustment Requests						BUDGET IMPACT					
						Multi-Year Project Budget					
B. Budget increases / decreases to existing projects and programs											
Programs/projects where costs or expenditure timing has increased/decreased due to unforeseen changes in market economic conditions or unavoidable changes in project scope; increases in scope afforded by external funding contribution opportunities											
Impact on Capital Plan	2023-2026 Capital Plan Service Category / Sub-Category		WBS	Project Name	Reason for Adjustment	Current	Change	Proposed	Funding Source(s) for Changes to Multi-Year Project Budget	Addition to 2019-2022 Capital Plan	Addition to 2023-2026 Capital Plan
Addition to 2019-2022 Capital Plan	02. Childcare	C. Programs	CNS-00098	2022 Renovations - Childcare (0-4 Years) (2019-22)	<b>Increase to Multi-Year Project Budget and 2019-2022 Capital Plan:</b> This budget adjustment request is to recognize funding from the developer, in lieu of foregoing a letter of credit. The developer was supposed to install an access control system for an in-kind project at 131 West 2nd Avenue. The City has to undertake the scope of work instead.	163,000	99,000	262,000	External - Letter of Credit	99,000	
No Impact (Reduction of previously approved Capital Budget)	07. Civic facilities & equipment	A. Administrative facilities	CCS-00154	Office Workspace Expansion (Sep 2018) (2015-18)	<b>Decrease to previously approved Multi-Year Project Budget:</b> This budget adjustment request is to reduce the previously approved budget in light of savings due to lower costs of tenant improvements and furniture, and receipt of higher tenant improvement allowance from the landlord.	7,100,000	(1,000,000)	6,100,000	Capital Facilities Reserve		
<b>Reallocations between multi-year project budgets</b>											
No impact (Reallocation of previously approved Capital Budget)	09. Water, sewers & drainage	B. Rainwater & sanitary water	CES-00085	2022 Sewer Main Reconstruction (2019-22)	<b>Reallocation of previously approved Multi-Year Project Budget:</b> This budget adjustment request is to reallocate funding to address scope increases and cost escalations in the Hydrovac facility implementation project. The original scope of the project was to support remedial work and upgrades to the existing Hydrovac storage facility to allow storage of the CNG HydroVac trucks used in Sewer operations (Council approved Feb 23, 2021). The current design phase and the geo-tech reviews have indicated a need for demolition of the existing structure and construction of a new facility due to unanticipated soil and building conditions. On further review of available options and considering the impact on operational efficiency, it is recommended to proceed with demolition of the existing structure and construction of a new storage shed.	54,323,557	(2,500,000)	51,823,557	Sewer Debenture		
No impact (Reallocation of previously approved Capital Budget)	09. Water, sewers & drainage	B. Rainwater & sanitary water	CES-00084	Hydrovac Facility Implementation (2019-22)	  The budget reallocation being proposed is from the 2022 Sewer Main reconstruction program which will result in deferral of 400 meter of sewer main renewal work to 2023-2026 Capital Plan.	1,500,000	2,500,000	4,000,000	Sewer Debenture		
<b>Total - Budget Increases/Decreases to Existing Projects/Programs</b>						<b>\$ 147,260,944</b>	<b>\$ 11,427,065</b>	<b>\$ 158,688,009</b>		<b>\$ 6,645,000</b>	<b>\$ -</b>
