The commercial space will compliment the local area well as a mini-shopping area for local residents. Having the secured rental units is great as well as we are sorely lacking these units in the city. The project site is located near two bus line which directly feed into skytrain stations on two different lines, so there are great transportation options for future residents and shoppers. Being nearby Renfrew Park and the Community Centre is a great amenity for residents as well.	Nyan Saik Krat
