TO: Vancouver City Council
FROM: General Manager of Development, Buildings and Licensing
SUBJECT: 2024 Fee Schedule for Streamlined Business Licence Types

Recommendations

- A. THAT Council approve, in principle, fees for the streamlined business licence types that were approved by Council on May 10, 2023;
- FURTHER THAT the Director of Legal Services bring forward for enactment the necessary amendments to the License By-law, generally in accordance with Appendix A.
- B. THAT Council approve, in principle, changing the date on which the streamlined licence types come into effect, and the date on which amendments to two definitions enacted under By-law No. 13884 come into effect, from April 1, 2024, to May 6, 2024;
- FURTHER THAT the Director of Legal Services bring forward for enactment the necessary by-law amendment to change the date of implementation to May 6, 2024, generally in accordance with Appendix B.

Purpose and Executive Summary

In [May 2023](#) Council approved amendments to the License By-law to reduce the number of discrete business licence types from over five hundred to eighty-eight. The purpose of this report is to seek approval of fees for these licence types and an implementation date of May 6, 2024. Staff propose a fee schedule based on the business licence fees approved by Council on [September 13 2023](#).

If approved, the proposed fee schedule will maintain City revenues and limit the number of licence types affected. Eighty percent of existing licence types will see no change in fees. Twelve percent will see fee increases, with most increases being less than \$35. Eight percent

will see fee decreases.

To ensure a smooth transition from existing to streamlined business licence types and fees, staff propose an implementation date of May 6, 2024 to allow for full completion of required technical updates and staff training. The date previously approved by Council was April 1, 2024. If staff recommendations are approved, new businesses applying for a licence on or after May 6, 2024 will be licensed with the new licence types and the new fee schedule.

This change will have no immediate impact for businesses that have already obtained a licence for 2024. The new licence categories and updated fee schedule will be applied upon renewal of those licences for 2025.

Council Authority/Previous Decisions

- [Section 272](#) of the Vancouver Charter authorizes Council to make by-laws and set fees for the licensing of any business, trade, profession, or other occupation.
- In [May 2023](#) Council approved amendments to the License By-law to reduce the number of business licence types from five hundred and seventy to eighty-eight. Implementation of the streamlined licence types was approved for April 1, 2024.
- In [September 2023](#) Council approved licence fees for the 2024 business licence year.

City Manager's Comments

The City Manager concurs with the foregoing recommendations.

Context and Background

In [May 2023](#) Council approved amendments to the License By-law to reduce the number of business licence types from over five hundred to eighty-eight. The smaller number of licence types will support the City's transition to online business licensing, improve clarity for businesses, improve data analysis, and better accommodate new and evolving businesses. Reducing the overall number of licence types requires reducing the number of associated licence fees.

On [September 13, 2023](#) Council approved a business licence fee schedule for the 2024 licence year. That fee schedule aligned some fees more closely with fees in other municipalities. Staff propose a set of fees for the new streamlined licence types (Appendix A) in line with the 2024 fee schedule.¹

Discussion

The new, streamlined licence types merge two or more existing licence types into one ([May 2023](#)). Accordingly, the existing fee structure must be reviewed and revised to reflect the new consolidated licence types. In most cases, the fees of licence types being merged into one are

¹ The 2024 fee schedule was enacted for the 2024 renewal of existing business licences. The proposed fee schedule will come into effect in Spring 2024 with implementation of the new streamlined licence types.

all the same, and the proposed fee for the new licence is the existing fee. For example, fourteen types of sports and fitness instructors are being merged into the licence type Sports and Fitness Instruction. All fourteen have existing licence fees of \$250. The proposed fee for Sports and Fitness Instruction is \$250. If the proposed fee schedule is approved, the businesses will see no change in their licence fees.

In other cases, licence types being merged have different fees. For example, the six licence types being collapsed into the licence called Recycling and Resource Recovery Services have fees ranging from of \$219 to \$250. The proposed fee for the new licence type is \$250. Four of the existing licence types will see fee increases because of being merged.

In proposing fees, staff aligned with benchmark fees like the 'standard' licence fee of \$250 whenever appropriate and possible.² Other key considerations were impacts on City revenue and the number of licensees affected.

In addition to harmonizing fees for streamlined licence types, staff propose to align similar fees across different licence types in cases where the fees are very close in dollar value. For example, the annual licence fee for Financial Institutions is \$1,844 and the annual fee for a Public Market is \$1,866. In 2023 one hundred and ninety-two Financial Institution licences were issued and three Public Market licences were issued. Staff propose to change the fee for Public Market to \$1,844. This change would have a negligible impact on City revenue. Reducing the number of fee levels contributes to the on-going simplification and streamlining of the City's business licence regulation, processing, and fees.

If approved, the proposed licence fee schedule (Appendix A) will retain the City's revenues and result in fee increases for twelve percent of existing licence types. Most of the increases will be \$35 or less. Eight percent of licence types will see decreased fees. The remaining eighty percent will see no change. Appendix C shows how the licence fee structure has been streamlined.

The date for implementation of the streamlined licence types was set for April 1, 2024.³ Staff propose that this date be moved to May 6, 2024 to accommodate technical and staff training requirements for the transition from existing to streamlined licence types. As a result, the in force and effect date of amendments to two definitions enacted under [By-law 13884](#) must also be amended from April 1, 2024 to May 6, 2024.

Financial Implications

There are no financial implications associated with this report's recommendations. As noted above, the transition to streamlined licence types is anticipated to be revenue neutral to the City.

² The standard licence for of \$250 was established in the Licence Fee Report approved by Council on [September 13, 2023](#). Over 80% of licensees pay the standard licence fee.

³ Existing licence holders will be transitioned to the new licence types at renewal in 2025. This timeline was set to allow for the smooth transition of the licensing system including and communication with businesses.

Legal Implications

There are no legal implications associated with this report's recommendations.
