2025-06-24	21:41	CD-1 Rezoning: 1527 Main Street	Support	I live immediately next to this property and I cannot wait for it to be redeveloped. I'm in full support of this proposal. It's crazy that this remains hopelessly underdeveloped given that it will soon be close to three skytrain stations and is walking distance to downtown and the new hospital. The sooner this moves forward the better. I would like to see the planned improvements to the waterfront park to be expedited given how many new residents will be coming to the neighbourhood through this and the City-owned project next door. 2025-06-27	12:46	CD-1 Rezoning: 1527 Main Street	Support	This project is a fantastic opportunity to add a significant number of new homes close to rapid transit and close to the new hospital. It will also have no displacement of existing tenants and provide new retail opportunities. Hopefully this will make the area around science world and east false creek a destination with a better urban environment.	Haakon Koyote	Kitsilano
