CD-1 Rezoning: 2028-2038 Barclay Street - Oppose

Date Received	Time Created	Subject	Position	Content	Author Name	Neighborhood	Attachment
2026-02-18	12:38	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	I strongly oppose the rezoning of this property. It would destroy forever the peacefulness and liveability of the west of Denman community, increasing traffic, noise and pollution. It is not consistent with the West End Community Plan. Please do not pass this rezoning application. My vote in the upcoming municipal election will reflect my views. Thank you!	Verna Dudley	West End	
2026-02-18	12:48	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	This proposed hotel project does not solve residents needs for housing yet increases traffic & parking congestion in an already limited quite residential area while also potentially impacting any emergency services needing to have access to a neighborhood that should be free of gridlock. This hotel is also going well above building height limits on a site that is too small, thus breaking zoning laws.	J Murphy	West End	
2026-02-18	13:02	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	While I support the development of new hotels in the West End, this project is out of scale with the surrounding urban fabric and will negatively affect the quiet residential nature of the street. I encourage council to consider something at half the proposed size which would still see, at least, a doubling of rooms compared to the existing hotel, and will be more compatible with the proximate buildings. It seems that streets like Denman/Lower Robson could, with a review of policies, be more easily absorb larger scale hotels.	Bill Pechet	West End	
2026-02-18	13:32	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	I have lived at 2050 Nelson Street since 1993. I cannot overstate my appreciation and attachment for my quiet, leafy neighbourhood, one in which residents look out for each other and generally display a community spirit. The intrusion, may I say rather invasion, of a 20+ storey hotel into the neighbourhood would negatively affect the quality of life for residents, while providing amenities to visitors to Vancouver who have no investment in our community. I am mindful that the City would no doubt be the recipient of more taxes from hotel than from a residential building, but I expect the Council to be aware of where its duty to represent lies. I question the need for more hotel space in the West End; I remind the Council of the redevelopment of the Landmark and the Coastal Plaza into residential facilities—had more hotel space been needed, those redevelopment projects could have been expected to address that need. Please, do not allow this proposed rezoning at 2828-38 Barclay Street.	Kathleen Rittenhouse	West End	
2026-02-18	13:38	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	The developer for this project has not acted in good faith and has not been transparent with the community. This is bad community development and as I'm certain you are reading in other comments - this project is simply not a good fit for the location. And the lack of engagement with your largest neighbour - the Parks Board - is inexcusable. Please DO NOT support this project. There is plenty of opportunity on main arteries in the West End (Davie, Denman, Robson), for a large hotel.	David Love	West End

CD-1 Rezoning: 2028-2038 Barclay Street - Oppose

Date Received	Time Created	Subject	Position	Content	Author Name	Neighborhood	Attachment
2026-02-18	13:44	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Mayor and Council, I'm a West End resident s.22(1) Personal and Confidential writing to strongly oppose the rezoning/application for 2030 Barclay Street. This proposal is far out of scale for an interior residential block, seeking roughly 27 storeys (~88 m) and ~12.75 FSR. Approving a tower of this magnitude in the middle of the neighbourhood undermines the intent of the West End's planning framework and sets a precedent for more spot rezonings that erode plan integrity and livability. My core concerns are the predictable, permanent impacts: traffic congestion and curb conflicts from ride-hailing/taxis, ongoing loading and service vehicle activity, and increased noise from a high-turnover hotel/serviced-apartment use, impacts that will spill onto nearby residential streets. If Council wants additional hotel capacity, it should be directed to arterials and commercial corridors (e.g., along the neighbourhood edges such as Beach Avenue or other suitable mixed-use locations), not inserted into the heart of a residential area. Please vote NO on this application.	Megan Kaptein	West End	
2026-02-18	13:49	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	As nearby residents, we oppose the proposal to build a high rise hotel tower in this quiet residential area -- for the same reasons that thousands of others have undoubtedly told you -- ie., - noise; - excess traffic and overloading of local streets -- already a problem; - increased problems with parking, which is already a major problem due to scarcity; - safety of residents due to increased transient visitors; - etc. A high rise tower will adversely affect the character of the neighbourhood. There is already a concrete wall along the edge of Stanley Park -- a mistake by previous city councils. NO MORE errors in judgment, please. Hotels belong on major commercial streets -- eg., Robson or Davie, or in the downtown core close to amenities and transit hubs. Constructing a hotel in these locations would have little opposition because it makes more sense. Hotels do NOT have a place in quiet residential neighbourhoods. Question: If hotels are required, why did Council permit the demolition of the Landmark Hotel on Robson or the the conversion of the Coast Hotel on Denman? Please do NOT approve this high rise hotel. Yours sincerely, Don Moore	Donald Moore	West End	

2026-02-18	13:51	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	I oppose the rezoning of 2030 Barkley to accommodate a 25 story hotel because: It will set a precedent for the development of other large, non-residential properties. It will increase vehicle traffic in a quiet, residential area. This site is too small for a tower. It has 99 feet of frontage instead of the required 130 feet. Engineering Services does not support the developer's plan for loading and parking. There isn't enough room for hotel guests and deliveries, meaning Barclay Street will become a permanent loading zone.	Jean Emmerson	West End	
2026-02-18	13:58	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Mayor and Council, I acknowledge that this proposal is being considered under the Hotel Development Policy as an expansion of an existing 30-suite hotel to a 270 unit hotel with restaurant. My comments are not directed at hotel use itself, but rather at the structural planning implications of the proposed built form within the West End context. 1. Structural Tower Siting & Site Geometry Concerns The proposal introduces a tower form on a site with sub-minimum frontage relative to the tower siting assumptions embedded in the West End planning framework (30m vs 39.6m), or 24.3% below the minimum. Minimal separation between structures must be no less than 24.4m (no measure stated) This raises several long-term planning considerations: • The constrained site width creates a permanent tower separation limitation • Future redevelopment flexibility of neighbouring RM-5B parcels may be reduced • The proposal effectively externalizes siting constraints onto adjacent properties Once constructed, these geometric constraints cannot be mitigated through later design refinements. This is therefore not simply a design preference issue, but a structural planning condition with lasting neighbourhood implications. 2. Precedent & Plan Integrity Considerations Approval of tower-scale intensification on a constrained frontage site introduces a precedent condition that warrants careful consideration. Specifically: • It may weaken the predictability of the West End tower siting framework • It could increase rezoning pressure on similarly constrained parcels • It risks creating incremental erosion of Plan geometry assumptions Community plans derive much of their value from consistency and long-term stability. Deviations with broad implications should be weighed cautiously. 3. Redevelopment Equity & Neighbour Impacts	Brydon Coby	West End	

				The proposed tower siting configuration may result in unequal development conditions across neighbouring properties. Potential effects include: • Reduced ability for adjacent parcels to achieve optimal tower separation • Distortion of redevelopment potential between parcels • Transfer of planning constraints to sites not subject to this rezoning These impacts extend beyond the immediate project site. 4. Livability & Shadowing Interface While some shadowing and overlook conditions are inherent to urban development, this proposal concentrates impacts within an established apartment-dominant street environment. Incremental effects on: • Nearby residential units • Childcare outdoor space • Public realm solar access should be evaluated in the broader context of West End livability objectives. 5. Policy Balancing Consideration The Hotel Development Policy provides clear direction supporting hotel supply objectives. However, policy support for height and density does not automatically resolve structural built-form conflicts arising from constrained site geometry. The decision before Council is therefore a balancing exercise between: • City-wide hotel policy objectives • Long-term neighbourhood planning stability • Structural tower siting implications • Measurable livability impacts Closing I respectfully ask Council to consider the long-term planning consequences associated with tower siting on a constrained site, particularly as they relate to precedent, redevelopment flexibility, and Plan integrity. Thank you for your consideration.			
2026-02-18	14:09	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	This is not an appropriate development for this neighbourhood. This proposal will disrupt local living and exhaust an already difficult and overpriced expense for parking and access within the area. There are many other viable real estate locations to consider placing a facility like this in an area that would be more financially viable to support local businesses and the entertainment district. We are directly next door to the proposa s.22(1) Personal and Confidential s.22(1) Personal and Confidential).	David Belland	West End

CD-1 Rezoning: 2028-2038 Barclay Street - Oppose

Date Received	Time Created	Subject	Position	Content	Author Name	Neighborhood	Attachment
2026-02-18	14:37	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	I do not believe this hotel is in keeping with the hotel policy or the west end community plan, the long term stay rooms make up 75% of the hotel and will do very little to fill the need for affordable hotels here in the city	Joshua Williams	West End	
2026-02-18	15:10	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	The placement of this proposed 25-storey hotel seems ill advised. While councillor Sarah Kirby-Jung has noted (in an interview with Stephen Quinn/CBC) that she managed a hotel in the West End, since shuttered, she failed to mention that it was within steps of Denman Street. The proposed behemoth is to be ensconced blocks away in an area that is largely residential. Respectfully, perhaps Mayor Sim would like to have a 25-storey hotel within half a block of his home. I would definitely support that. I found this in a February 17, 2026 posting on the City Hall Watch website: "While the BC Hotel Association (BCHA) and Destination Vancouver have indeed highlighted a hotel shortage, their 2025 “Hotel Community Impact Assessment” recommends diversification, not just raw height. They advocate for boutique models and low-rise hotels (up to 4 storeys) to “animate” and “enliven” neighborhoods without destroying them. The BCHA and the City’s own recent policy updates (April 2025) focus on low-rise hotels (3.5–3.7 FSR) along commercial high streets. What Marcon is asking for – a 11.84 FSR tower in a residential mid-block – isn’t “city building.” It is an extreme outlier that shatters the very policies the Hotel Association helped design." Perhaps something better suited to the neighbourhood? At a time when real estate developers have run into financial difficulties (due to their greed and short-sightedness) why approve this exercise in hubris?	Maryse de la Giroday	West End

CD-1 Rezoning: 2028-2038 Barclay Street - Oppose

Date Received	Time Created	Subject	Position	Content	Author Name	Neighborhood	Attachment
2026-02-18	15:14	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Dear Mayor and Council, In reviewing the public hearing correspondence submitted in support of the proposed hotel development at 2028–2038 Barclay Street by Marcon I note that several supporters appear to have professional affiliations within the real estate development and construction sectors. James Tod – Founder of JTA Development Consultants and a participant in committees associated with the Urban Development Institute (UDI). Eric Freiboth – Publicly identified as a project manager with PCI Developments. Dustin La Prairie – Appears to be associated with the La Prairie Group, active in construction and related sectors. These affiliations are drawn from publicly accessible professional records. No inference is made regarding coordination or impropriety. However, we respectfully submit that Council should be aware that a portion of the support correspondence originates from individuals professionally engaged in the development industry. For transparency and clarity in public hearings, Council may wish to consider: Whether voluntary disclosure of professional development affiliations in written submissions would improve transparency. Whether staff reporting could categorize correspondence by general stakeholder group (e.g., nearby residents, business owners, industry professionals), without editorial commentary. How to ensure that local neighbourhood voices are clearly distinguishable within the public record. Our intention in raising this is not to diminish any individual's right to participate, but to support a fully informed council as you deliberate the application. Please vote "No" or "Defer" Thank You	Crystal Tadman	Kitsilano	
2026-02-18	15:14	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Please find attached the 6000 online and live petition signatures opposing the rezoning at 2030-2038 Barclay St. My name is Maureen Wilson and I am a resident of Vancouver, B.C.	Maureen Wilson	West End	Appendices A, B and C
2026-02-18	15:31	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	To Vancouver City Council, This is a massive project and this lot is way too small with only 99 feet of frontage where the requirement is 130 feet! Don't bypass the Park Board. It needs to do a formal review since a project of this size requires a serious plan to protect our park and quiet residential neighbourhood, especially Barcaly Street. The traffic here is already congested and a 248 room hotel will create an impossible situation. Engineering Services does not support Marcon's plan for loading and parking. Barclay Street would become a permanent loading zone. Your vote on the rezoning will directly determine my vote on October 17. We are a well-organized community and will remember and remind everyone else. I urge Council to vote NO on this rezoning.	Len Satov	West End

CD-1 Rezoning: 2028-2038 Barclay Street - Oppose

Date Received	Time Created	Subject	Position	Content	Author Name	Neighborhood	Attachment
2026-02-18	15:35	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	The West of Denman neighbourhood is a small town within the West End. A huge development at 2030 Barclay Street will have nothing but negative effects on the area. The chaos that the construction will cause will be horrendous for the residents for many years. This is a residential neighbourhood and rezoning to accommodate a huge hotel is just wrong.	Elizabeth McKenzie	West End	
2026-02-18	15:50	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	I am strongly opposed to this project in its current location. The area west of Denman is a long established residential neighbourhood defined by its quiet character, pedestrian friendly streets, and extensive traffic calming measures. It is not designed—nor intended—to absorb the level of activity generated by a large hotel. Introducing a high capacity commercial use deep within this residential pocket would significantly increase vehicle traffic, congestion, and service related activity. These impacts would undermine the neighbourhood's livability and contradict the planning principles that have shaped this area for decades. A project of this scale is far better suited to a major commercial corridor such as Denman Street, Davie Street, or Robson Street—locations that already support higher density, transit access, and visitor oriented uses. Placing the development there would align with existing land use patterns and minimize disruption to established residential blocks. For these reasons, I respectfully urge Council to reject the proposal as currently sited and direct the proponent towards development in a more appropriate location.	Ross McKinnon	West End	
2026-02-18	15:56	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	My name is Nancy Conlin and I live at s.22(1) Personal and Confidential I am opposed to the zoning application and construction of a towering hotel on a narrow, quiet street in a residential area. This commercial venture is out of place in our neighbourhood. The volume of traffic will increase dramatically and we already have many delivery trucks such as Purolator, Amazon, FedEx and UPS, Shaw and Telus vehicles too, not to add Uber and taxis. Our parking west of Denman has been severely restricted to now to Lagoon to Denman. I am worried that a hotel of this e or ours size would be better located nearer to upscale shopping, sports venues and transportation to and from the airport. There have been two locations off Denman that could not make it work. One went bankrupt and the Coast Hotel was converted to apartment suites. The 2000 block of Barclay sees children going to the Pooh Corner Day Care on Lagoon and it is a popular route for taking dogs for a walk. The inconvenience will be shared by all walkers as well as drivers. The lot on which the hotel would be built is small and located next to Conn Lodge which is in disrepair and was designated for low income. Other apartments have been renovated on the inside but still show their age. We will lose of sense of community if this is built on the site. The building and the design is first class. I do t think I would oppose it if it was one third of the size. I am sure feasibility studies were conducted in the profitability potential. The hotel would bring jobs to the area but it would also bring jobs to a different location. Thank you the opportunity to voice my opinions.	Nancy Conlin	West End	

CD-1 Rezoning: 2028-2038 Barclay Street - Oppose

Date Received	Time Created	Subject	Position	Content	Author Name	Neighborhood	Attachment
2026-02-18	16:03	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	The very fact that this rezoning application is being considered by the city government clearly demonstrates a lack of understanding of what 'community' means, how it has been achieved, and what is needed to sustain the delicate balance that unites friends, family, and neighbours in this 'residential' neighbourhood.	Peter Woods	West End	
2026-02-18	16:07	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Dear Vancouver City Board Members, Regarding the proposed rezoning of 2030 Barclay st: We the residents of west of Denman street give a firm NO to the proposed tower project. OUT OF CONTEXT: The proposed tower is out of context with our residential neighborhood. It's too tall, the base is too small, it will steal light from the surrounding residences as well as preventing the neighboring properties from their own development. This is like bullying. We don't want the extra disruption, traffic, noise and change in tone and character it would certainly bring to our community. We don't want a giant modern "pseudo natural" tower looming right over our heads. We already have hotels and B and B's here, thanks. We are very proud of the character of west of Denman as it is and as all Vancouverites should be. We have already lost a significant number of our valuable heritage buildings. We want to protect the West End as the attractive asset it is. Charm…is in short supply in our world and is well worth protecting. Rosellen could be a designated Heritage site. Kathryn Hepburn stayed there, among many other glitterati. A huge commercial tower with a pool and a bar and partiers would destroy the character of our neighborhood. No thanks. The large Coast Hotel on Denman street was an overall failure. It was turned into apartments and reduced to a much smaller hotel. The Parks Board must be consulted on this plan. Please hit pause until that step has been completed. Engineering Services does not support the developers plan for loading and parking. Doesn't it seem the developer is trying to push its agenda through prematurely, ignoring essential steps, just for their own benefit? Please hit pause on this project until all the proper legal steps and consultations have been taken and verified. We are already under daily fire from the four-year Water Main Project and its extensions which go deeply along Chilco st. We are surrounded with daily construction. Loud machines that get in your brain and under your skin and make work at home impossible. Giant trucks that make the ground shake around us and constant traffic disturbances we are forced to endure until 2030. We are already living here with a full-on construction invasion. And you propose adding on yet another major project only two blocks away? It's unthinkable. Build it somewhere on the Canada line. That makes more sense. None of the proposal arguments justify allowing in another major project, especially one that has not been transparent. Please stop it now. "I urge Council to vote NO on this rezoning." Your vote on this issue will directly affect my vote, on October 17.	Holly Burke	West End	

2026-02-18	16:07	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	The egregious manipulation by this mayor, his supporting council members, and the developer Macron - regarding this hotel rezoning application will not go unnoticed in the next election. Bet on it. Your blatant disregard with the attendant 'piggery' for 'profits' is a shameful denuding of human compassion, human rights and human decency for the West End Community of people, the wildlife of Stanley Park, the bird sanctuary of herons and songbirds who have resided here since the 1890s. Your actions are pathetic imitations of the same flagrant disrespect and disregard the present U.S. President holds for American residents. Be warned: outraged citizens will continue to fight back: note the early 1970s protests against a similar hotel project by the Lions Gate causeway, where hundreds of protestors maintained their fight for months and months…and…. months …until that developer finally walked away. I believe it is 'fair comment' to add that I am legally cognizant about taking 'government officials' (in my case to the Federal Government in Canada vs.(the purported remnants of the Chinese Comintern operating in Vancouver) to court, and winning my case. Stirring up this memory of this personal fight from 15 years ago only galvanizes me further to fight you on the 2030 Hotel Rezoning application. My final point is the obvious point: Here, I feel it is necessary that in order to reach the numbskull thinking of this mayor and his supporters it must be stated in bold italics: There is a housing crisis in Vancouver - that you are tearing down existing residential homes on Barclay Street- in a market where housing is outrageously expensive - making the issue of Rezoning preposterous, absurd and down right stupid. When tourists the world over are seen as locusts…how can you justify tourism being good for any area, including Vancouver with it's housing crisis?	Sulaika Ochs	West End	
2026-02-18	16:32	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	The West end is the last lovely neighborhood downtown. Much expense and consultation was done several years ago to develop a plan and should remain. A hotel would cause traffic disruption in this quiet area with increase car traffic, delivery trucks at all hours, loss of parking. Not to mention the drain on electric power that is becoming an issue. Do not change this area, Vancouver was noted world wide as a liveable city. Do not destroy that!!	Dianne Ruzgaitis	West End	
2026-02-18	16:54	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Comments to City Council re Feb 19 Barclay 2028-2038 Re-Zoning Proposal (B. Sullivan) I live on the Park, three blocks south of the proposed re-zoning. I support hotel expansion in the West End that is of a scale and form compatible with the neighbourhood. The proposal and Bylaw before you clearly are not. I cannot support it as currently set out and propose several actions Council can take to strengthen the proposal Why not? First, the Proposal: It has been clear from the outset that the site is poorly situated and hopelessly constrained for the scope of what is proposed. That is evident even from the Planning Dept's comments in the referral document you received two weeks ago - ". . . while the proposed form of development does not meet the baseline expectations of RM-5B zoning nor the West End Community Plan, it does meet the intent of the Hotel Development policy which contemplates consideration for certain form of development relaxations to enhance project viability" <a proxy for satisfactory financial return>. Engineering Services also voiced major concern about the feasibility of developing the required infrastructure to support this scale of activity on the subject site. The frontage itself (90 ft) is only 69% of the current requirement. The proposed tower separation is only 20 ft, drastically short of the current 80 ft requirement and effectively meaning that both neighbouring properties will be unable to utilize their current re-development capacity. (Fig 3 from Appendix D of the letter of referral illustrating the tower separation situation seems to have been omitted from the public distribution.) And the Bylaw amendment before you is full of "we can work it out" assurances.	brian sullivan	West End	

Meaningful renderings have not been available but the main image is an undistinguished tower not in keeping with the architect's reputation. There has been no detailed consideration of the enormous traffic demand and expense that will be generated at this gateway to the Park, nor of the risk of accidents and endangerment of children and their families utilizing the City's own child care centre child care centre only100 metres away across Lagoon Dr.

There may well be West End facilities with a hotel license who could be considered for re-zoning. But this proposal, the first effort to undertake the case by case consideration option opened up by the Hotel Development policy that came into being in July of last year, is extremely ill-considered. That is obvious from the concerns being raised, the architectural form and finish shared to this point, and the painful gyrations in the referral document to try to find a way for this proposal to advance.

Second, Consultation Process:

There has not been meaningful consultation. The whole thing has been a series of announcements, with the proponent talking at people. The scheduled public hearing was cancelled, replaced by a series of poorly publicized one-way presentation sessions. The proponent was also allowed to defer the Urban Design Panel review typically scheduled before Council receives the referral, when there is substantial community engagement evidenced, because they convinced the City that any concerns could be "worked out" with the UDP in discussion post-approval. In addition, the neighbourhood area identified for required notification is ludicrously limited given the wide-ranging impacts.

As I understand it, the proponent suddenly withdrew a condominium proposal for this site that had community support. Several months later, it proposed the hotel development and a sign went up. All this was prior to finalization of the new Hotel Development policy that paved the way for such a proposal to be tabled at all. The plainest way to make sense of this is that the new plan served as the impetus for a new policy, without which it could not have been considered. The march to approval then commenced.

Finally, Prospects for Success:

The proposed Bylaw does not provide clear or effective criteria to address the thorny issues of scale, form, and impact that come with this particular proposal. Enormous latitude is left in the hands of the Director of Planning and the Development Permit Board to adjudicate significant relaxations to existing policy (e,g, exclusion of certain common areas from the computation of floor area; exceptions to the maximum building height.) and with regard to approval of "Design development to explore opportunities for increasing side yard setbacks" - what the heck does that mean? - and "Design development to improve the architectural expression to better reflect the residential character of the neighbourhood and contribute a high-quality additional prominent urban fabric of the West End area" (It doesn't yet.)

It is a very problematic proposal. Council is urged to mandate that additional time and further consideration be undertaken to arrive at a strengthened Bylaw.

To that end, it is recommended that Council:

Make the latest renderings widely available.
Provide a further explanation about how the tower separation is to be addressed by the proposed Bylaw and resulting impacts.
Immediately engage the Parks Board in a formal consultation. No approvals to this rezoning

				request should occur until that has occurred. Cooperate with West End civic groups to offer a daytime and evening open house where the latest plans are presented and representatives from City staff and the proponents are present to offer information and receive input. Following these steps, set out a process for considering potential revisions to the proposed Bylaw and . a way to provide community and proponent input on any such revisions. Marcon has a newly fashioned “Building for Life” vision statement. In it they commit to, and I quote, “focus the(ir) projects on delivering lasting value to communities,” “reimagining and strengthening the connection between people and the places where they spend time,” and “supporting thriving communities.” Their stated intent is to be “measured in growth and highly selective in approach, in order to focus (their) attention on the best outcomes.” May it be so. A ‘NO’ vote from Council now and adoption of these recommendations would help the proponent honour their own stated values and support this neighborhood’s uniqueness and livability, instead of eroding it. Thank you for your consideration. Brian Sullivan			
2026-02-18	17:01	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	I just learned that the Park Board has not been involved. Why? This development definitely will have some impact on the park, and the Board should have an important role to play in the review process. It's this 2028 now? I thought it was 2030. That's very confusing, what's the address that is being developed? Why the change. I saw in the referral report that there's now a new submission that hasn't gone public, going from 27 to 25-storey tower proposed. That's also confusing, when did that happen? From the Developer's letters, they say that they care about the unique character of this area. Can they please develop something accordingly? A hotel tower seems a lot of risk to take for that location. They have also been misleading with their communications, talking about a 27-storey hotel being a "boutique" hotel. The BC Hotel Association and Destination Vancouver Hotel recommend boutique hotels (5 floor, 50 rooms) for the West End/Stanley park. Thanks, javier Thanks,	Javier Ojer	West End	

CD-1 Rezoning: 2028-2038 Barclay Street - Oppose

Date Received	Time Created	Subject	Position	Content	Author Name	Neighborhood	Attachment
2026-02-18	17:21	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	This development would not only radically change the atmosphere of this quiet residential neighbourhood, it would destroy it. The quiet streets with residential buildings that are a hallmark of this area would be completely changed by both the construction and operation of a hotel of over 20 stories that would see a massive increase in daily foot and car traffic in areas not designed for this use. Recently, city employees working on lampposts on Nelson street said in conversation to a neighbour that they were stunned to see a two-block backup of traffic on Nelson Street due to the summer season and some local rerouting implemented by the city - they had never seen so much traffic in the area. This would be far worse should a hotel capable of accommodating 500+ people in 248 rooms be built in this area. I am curious if all those voting on this have actually visited the site - if not, it is absolutely impossible to be appropriately attuned to the damage this would do to the area. Looking at a map and architect drawings cannot appropriately indicate the incompatibility of this proposal with the integrity of the neighbourhood. It would be an absolute violation of the city councillors' duty to serve the residents if they did not visit the site in person to sense the current physical conditions of this setting and the ambiance. If Vancouver requires more hotel accommodations, this is not the neighbourhood for this. There are many high-rises being built in more urban areas - the three next to Burrard bridge, for example - that would better suit this function without destroying a quiet residential neighbourhood close to Vancouver's idyllic Stanley Park. The impact on the longtime and newer residents, the character of the neighbourhood, the nature in this area, and traffic would not just be harmful, but irreparable. City councillors have an obligation to serve the residents of this city and the city as a whole. Voting yes for this proposal is a nail in the coffin of a city whose charm and character has already been disappearing with overdevelopment.	Mark Ainley	West End	
2026-02-18	17:24	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	I am opposed to the proposed 29-storey, 200+ suite short- and long-term hotel apartment tower in our residential neighbourhood near Stanley Park. The original proposal for a smaller building intended primarily for local residents and taxpayers was far more appropriate for this area. I am not opposed to hotel or serviced apartment developments in principle. Such projects would be better suited to major commercial corridors like Denman, Georgia, or Robson, where higher density and visitor accommodations align with existing urban activity. However, placing a large, primarily transient development in a quiet residential area adjacent to the park undermines the character and purpose of this community. The limited, precious space near the park should be preserved for long-term residents—people who live and work in Vancouver year-round, contribute to the local economy, and sustain the services that make this city function. This neighbourhood should prioritize stable, affordablebhousing and a wholesome living environment for citizens, not temporary stays. Thank you for considering these concerns.	Anuschka Elkei	West End

CD-1 Rezoning: 2028-2038 Barclay Street - Oppose

Date Received	Time Created	Subject	Position	Content	Author Name	Neighborhood	Attachment
2026-02-18	18:14	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	the proposed site of the hotel is in a residential area. the streets are narrow and a new hotel will bring much more vehicle traffic to already congested, narrow streets. the building of the proposed hotel will radically change the character of one of the most lovely vancouver neighbourhoods. this will affect those who live there, and all those who enjoy visiting that part of the city. further, it makes no sense to remove residential zoning when what we need in vancouver is more residential areas. The better location of a hotel is where the Century Plaza Hotel used to be, where there good vehicle access from Denman and public transportation is available. there is no public transportation to the proposed site	Mary Macaulay	West End	
2026-02-18	18:20	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	The proposed change of zoning would negatively affect residents of the West End. Narrow streets, and no public transportation in the proposed area would create bottle necks, and cut throughs. The character of the West End is unique, with wonderful pedestrian corridors, and the massive increase in traffic (taxi, uber, car rentals) associated with a hotel in this location would be a step backwards. We should work towards the quality of life of residents.	Sarah Macaulay		
2026-02-18	18:31	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	The Hotel Development Policy establishes enabling conditions, not automatic approvals. The policy enables hotels but does not require Council to approve every hotel regardless of size and community impact. This policy is meant to weigh citywide priorities alongside local plans—not ignore them. The Scale is Wrong: We aren't against hotels; we are against a 25-storey commercial tower on a narrow, tree-lined residential street. Zoning Matters: This site was already approved for a 10-storey residential building. Doubling the height ignores the West End Community Plan. Protect Stanley Park: Barclay Street is one of only four motor vehicle entrances into Stanley Park. A 248-room hotel at the entrance to Stanley Park will create significant traffic issues for our city's crown jewel. These impacts must be formally addressed between the Park Board and City Council before this proceeds.	Lemay Henderson	West End

2026-02-18	18:54	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	I am a long-time West End resident and I respectfully oppose the proposed development at 2030 Barclay. West of Denman is a distinct and sensitive pocket of the West End, defined by its quiet residential character, low-rise scale, and proximity to Stanley Park. Barclay Street west of Denman is predominantly low-storey, functions as a dead-end street, and does not operate as a downtown arterial. Treating this location as “downtown” overlooks its unique context and lived reality. Importantly, the West End Plan does not support this scale or form of development in this location. The Plan was shaped through extensive public consultation with residents, planners, and stakeholders, and it clearly directs hotel growth and density to more appropriate areas of the city. Vancouver already has numerous active and planned hotel developments in locations intended to absorb growth, including the Broadway Plan area, Northeast False Creek, and Mount Pleasant—areas with the infrastructure, transit capacity, and urban form to support it. This proposal runs counter to that city-wide planning logic. Community-led planning has shaped Vancouver for the better before. Much like historic citizen movements that successfully redirected inappropriate infrastructure projects, residents are not opposing growth itself—but rather growth in the wrong place. Preserving the character of West of Denman is not about resisting change; it is about respecting adopted plans, neighbourhood scale, and the thoughtful planning framework the City itself has committed to uphold. Thank you for considering these comments	Mustafa Akhtar	West End

CD-1 Rezoning: 2028-2038 Barclay Street - Oppose

Date Received	Time Created	Subject	Position	Content	Author Name	Neighborhood	Attachment
2026-02-18	19:10	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	To Mayor & Council: I am a homeowner near the proposed hotel development site on Barclay Street. I am strongly OPPOSED to the proposed hotel. This is a quiet residential neighbourhood . A high rise hotel is NOT appropriate for obvious reasons. Traffic is a major issue in the area now with its extremely limited capacity. A hotel would further overload our streets, making an already bad situation into a nightmare. The narrow residential streets simply cannot handle the additional loading from hotel guests, employees, and delivery vehicles. Parking west of Denman is currently inadequate. A hotel would make a bad situation worse. Noise and safety are two further concerns. And so on. I suspect that you have received input from hundreds or maybe thousands of other residents who have outlined reasons why a hotel should NOT be located at 2030 Barclay St. So I will not bother repeating those reasons again. I have no objections to adding more hotels to Vancouver and area. However, hotels should be located in commercial areas with the appropriate infrastructure - for example, along major thoroughfares with public transit. Robson and Davie Streets east of Denman would be far more desirable locations, as would the downtown core of Vancouver. There would likely be support for hotel development in these areas rather than opposition. Why is Council not mandating that hotels be located in these commercial areas as opposed to an inappropriate residential area? The proposed hotel is NOT supported by any of the residents / voters that I have been in contact with. Hopefully you listen to your constituents and DO NOT APPROVE THIS HOTEL PROPOSAL. Regards, V. Vidners	Valda Vidners	West End

2026-02-18	21:22	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	I and a lot of my neighbours have been very dismayed at the very thought of a 25 story hotel on Barclay St. This area west of Denman has long been a neighbourhood of renters and apartment owners with a string walking culture, walking dogs, swimming at the local beaches, enjoying the park , all with very little use of cars. Such a high hotel on a narrow mid-block property is contrary to the spirit and culture and would lead to an increase of taxis, cars, delivery and other commercial transports, to more noise pollution (restaurants both on ground floor and the roof deck, as I understand it). Most of us believe that there should be efforts to add to the number of neighbourhood like ours, and the recent City plan approved the west end community plan which restricts hotels to a boutique size. . I see no reason that this exemption should be granted. The City already approved a ten story hotel in 2022 and this was at least in keeping with the idea that boutique hotels might be considered in the west end.if the City approves this hotel, then you are creaking open the closed door to high rises in residential streets (other than the numerous approvals of buildings with at least one exposure to a Main Street like Davie, Thurlow, Alberni at Denman, etc,). We want you to protect the mixed neighbourhood that has developed and been admired for many years. Please refuse this alteration to our community and look to the west end community plan for guidance in allowing boutique hotels in some neighbourhoods, preferably not mid-block, not within a block of Stanley Park. More parts of the city should be open to small hotels to add to hotel space and there are certainly still many high rises going up all around us on more commercial streets. That is where 25 story hotels belong. The present proposal is a serious error in direction. Yours truly, MaureenGirvan Yours sincerely, Maureen Girvan	Maureen Girvan	West End	
2026-02-18	22:06	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Dear Mayor and Council, I am writing to formally OPPOSE the proposed rezoning to permit a 27 storey hotel at 2028-2038 Barclay Street in the West End. I support thoughtful economic development and recognize that Vancouver must balance tourism, housing, and neighbourhood liveability. While I recognize that the Hotel Development Policy enables new hotel construction in Vancouver, enabling conditions are not the same as automatic approvals irrespective of scale or community impact. Council retains discretion to assess whether this specific project aligns with broader planning objectives and neighbourhood context. In this case, the scale, location, and land use implications of this rezoning proposal warrant serious reconsideration. I respectfully ask Council to reject this rezoning application or require substantial reductions in height and scale to align with existing policy frameworks and neighbourhood context. My specific concerns are outlined below: Scale and Context: This is not opposition to hotels in principle. It is in opposition to a staggering 27 storey commercial tower on a quiet, narrow, tree lined residential street. The proposed height is disproportionate to the majority of the surrounding built form and will have material impacts on light quality, views, privacy, noise, traffic, surrounding nature, and neighbourhood character. Urban Design and Noise Impacts: the introduction of a 27 storey commercial property on a residential street will materially alter the sound environment. Hotel uses generate continuous activity cycles including early morning departures, late night arrivals, restaurant and patio operations, service and delivery traffic, and frequent curbside pick up/drop off activity. Unlike residential buildings, which typically produce predictable and lower intensity noise patterns, hotels create transient, 24 hour movement that changes the acoustic	Niamh W	Mount Pleasant	

				character of a neighbourhood. For surrounding residents, this noise will impact daily life. Additionally, given this site's proximity to Stanley Park including nearby sensitive ecological areas like the Heron's nesting ground, the cumulative increase in vehicle traffic, human activity, and noise warrants careful consideration. Urban design decisions at the edge of the beloved Stanley Park should account not only for resident livability, but also for the long term integrity of adjacent natural systems. Parking and Traffic Impacts: West End residents pay the highest cost for residential street parking in the city at over $400 annually, yet enforcement is inconsistent and parking spaces are extremely limited due to the new 'West of Denman' permit zone implemented in 2025. This rezoning proposal includes only approximately 70 parking spaces for 250+ hotel rooms. The overflow demand, whether from guests, staff, or service vehicles will inevitably spill into surrounding residential permit zones and coveted 2 hour parking for guests to the neighborhood. A hotel of this scale will generate high volumes of vehicle traffic activity, leading to double parking, curbside queuing, idling, and circulation traffic as vehicles search for space. In a dense residential grid with narrow streets, lanes and limited loading areas, this overflow demand will spill into the neighborhood and increase vehicle weaving, congestion, and safety conflicts for pedestrians and cyclists. These impacts should be formally evaluated in coordination with the city's Engineering Services department as well as the Park Board before any approval is considered. Zoning and the West End Community Plan: Long range planning only works if adopted frameworks meaningfully guide decision making. The West End Community Plan directs growth to defined commercial corridors and village centres while maintaining a livable, context sensitive scale on residential streets west of Denman. It emphasizes incremental change, protection of sunlight and privacy, and built form that fits the established neighbourhood character. Developing a 27 storey commercial hotel including a street level restaurant patio on a narrow residential street is inconsistent with that intent and represents a significant escalation in scale. Approving this rezoning would undermine the integrity and predictability of the Community Plan as a guiding policy framework. Precedent: Approving a commercial tower of this height in this location establishes a precedent across the City of Vancouver that weakens neighbourhood plan protections and signals that previously approved forms of development can be substantially altered without meaningful regard for community impact, or impact on the surrounding natural environment. Corridor based planning principles generally direct higher intensity commercial uses to major arterials, commercial villages, and areas well served by rapid transit infrastructure. Introducing a tower of this scale on a quiet residential street, instead of prioritizing its location along an established commercial corridor, reshapes expectations for future rezonings and signals a shift in how residential areas are treated within the broader urban hierarchy in Vancouver. Integral Planning Decisions: In closing, large scale commercial developments of this magnitude are rarely proposed in Vancouver's more affluent neighbourhoods due to the negative community impact. For example a hotel of this scale would not be approved in a neighbourhood like Shaughnessy. West End residents, the majority of whom rent their homes, should not be disproportionately asked to absorb the impact of a commercial project of this scale, simply because they do not have the privilege of home ownership. Thank you for your time and consideration. Sincerely Niamh			
2026-02-18	23:00	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Dear Mayor Kim and City Councillors,	Rebecca Hansen	West End	

I am writing to voice my concerns and strong opposition to the proposed rezoning of 2030 Barclay Street. Having lived as a resident of the West End for the past 13 years s.22(1) Personal and Confidential one of the things I most value about it is the fact that it still retains a neighbourhood feel despite its close proximity to downtown Vancouver. While other downtown neighbourhoods have turned into concrete jungles, this neighbourhood, with a few exceptions, acts as a transition in terms of building size and scale, to Stanley Park - one of the city's most iconic and treasured places.

Zoning rules in terms of height, density and setback limits have been set in this neighbourhood for good reasons: to manage noise and traffic flow, to maintain the character of the neighbourhood, and to respect the capacity of urban infrastructure. The proposal for 2030 Barclay Street would break all of the above zoning rules!

The City's Hotel Development Policy allows for a floor space ratio (FSR) of 3.5 for hotels in this area and the developer is asking for an FSR of 12.75 to 14.7. This is over 3.5 - times the allowed size and exceeds height limits by 300% which is totally unacceptable. Other objections include the following:

1) Overwhelms the neighbourhoods The proposed size, height (27 - 29 stories) and density is massively out of keeping with the rest of the neighbourhood and is incompatible in scale for the small narrow lot. It has only 99 feet of frontage instead of the required 130 feet. Moreover, by squeezing this tower onto a small lot, it permanently ruins the ability of neighbouring sites to develop their own land properly.

2) Brings increased noise and traffic - Operating such a large hotel and restaurant inevitably means a significant increase in traffic: taxis, delivery trucks, garbage removal vehicles. The proposed development would effectively turn a quiet neighborhood into a noisy commercial zone. In addition, the proposed street level outdoor restaurant and rooftop party pool would be noisy and disruptive to local residents, particularly those living in the immediate vicinity.

3) Destroys livability - A building of this height is going to block sunlight, decrease privacy and limit views. It could also create a ´canyon effect' and worsen wind tunnels. Engineering Services does not support the developer's plan for loading and parking. There isn't enough room for hotel guests and deliveries, meaning Barclay Street will become a permanent loading zone.

4) Seismic risk - The site is located in a high seismic risk area. An independent third party seismic risk assessment is absolutely essential before this rezoning application can even be tabled.

5) Implications for Stanley Park : It is irresponsible to approve a major development at the edge of Stanley Park without a formal impact study. A project of this scale requires a serious plan to protect our park and ensure the public can still enjoy the city's 'crown jewel' without commercial interference, and that there are no negative repercussions for the wildlife for whom the park is home. Eg. 2030 Barclay Street is within the protected buffer zone of the blue heron colony. I would therefore kindly ask that at a minimum, there be a pause put to this proposal so that the Park Board can complete a formal review.

If this rezoning proposal goes through it sets an extremely dangerous precedent. I fear that it will mark the beginning of many of the existing older buildings in the West End being torn down to be replaced by massive skyscrapers. The units in these new buildings will then be sold or rented for exorbitantly high prices which will not help the city in its stated resolve to address the lack of affordable housing.

				Council has a Choice. The City's Hotel Development Policy is a guide, not a mandate that forces Council to approve the rezoning simply to enhance the developer's profit margin! You have the power to hit pause today. Please defer this decision and tell the developer to come back with a plan that actually enhances the community. Please put people - law abiding, tax paying Vancouver citizens - over corporate greed and profit. We need affordable housing, not hotels! Sincerely yours, Rebecca Hansen			
2026-02-18	23:05	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	I strongly oppose this development proposal. It is completely out of keeping in size and scale with the rest of the neighbourhood, and will cause a lot of extra noise and traffic. I fear that if this goes through you are opening a Pandora's box and setting a terrible precedent for other developers to transform this neighbourhood into a concrete jungle.	Ali Kouki	West End	
2026-02-18	23:44	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Hello. I truly hope you will consider this decision very sincerely and with a community-minded hat on. Please think about the people and their lives and sense of wellbeing. The West End, especially West of Denman is such a wonderful community. I've lived abroad for 25 years and returned 10 months ago to live on this sublime piece of land (actually land that is Indigenous unceded territory). This neighbourhood, in just the short time I've been back, has given me a sense of belonging and joy. Practically nestled in the rainforest and close to the sea with the view of the mountains, and inhabited by people who help each other out, it is really not the place for a commercial high rise building. Life is already so crazy, unjust, and a struggle for most, and little pockets of communities like ours need to be preserved as they are essential in order for humans connect and thrive. A big hotel will ruin the vibe and 'ecosystem' of our neighbourhood. Granting the rezoning will also set an alarming precendence for other big developers to request the same. This would eventually erode the community as we know (and love) it. This is not just a zoning decision, it's a decision that affects real people, real lives, and the future of our community. I urge you to lead with both reason and compassion, and to turn down the rezoning and stop this 25-storey hotel being built at 2030 Barclay Street. Thank you, Ilana Levine	Ilana Levine	West End	
2026-02-18	23:59	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Imagine the street YOU live on. Then imagine right beside you and your neighbours, a misguided and careless wrong choice is made by people who could easily be voted out for making the wrong choice - and that would be voting yes to permitting a towering high-rise hotel to be forced into a tiny lot in a quiet, leafy residential neighbourhood that is filled with seniors and families in mostly low rise buildings. This does not have to happen on your street. And it MOST CERTAINLY DOES NOT HAVE TO AND SHOULD NOT HAPPEN ON MY STREET. Please do not make the wrong choice. I urge you to vote no to the rezoning of 2028-2038 Barclay Street. Yes, Vancouver needs more hotels and NO, Barclay Street is NOT where this hotel should be built. Your wrong choice in voting anything other than no will result in a permanently congested and barely accessible quiet, residential neighbourhood street. This rezoning proposal is unfair and unsafe and you know that. You know that! So do not bring to my residential neighbourhood that which you know you would never bring to your own quiet, residential neighbourhood. Again I urge you to vote NO to this rezoning of Barclay Street. There IS a different location entirely for this hotel that will be an appropriate choice that you can make. Barclay Street is the wrong choice. You know that. Vote NO!	Wesley Kent	West End

CD-1 Rezoning: 2028-2038 Barclay Street - Oppose

Date Received	Time Created	Subject	Position	Content	Author Name	Neighborhood	Attachment
2026-02-19	05:59	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	My name is MC, I and my wife have lived in the West End and west of Denman for the last 16 years. We invested all our savings in a small apt based on the character and current zoning of the neighborhood. That is, all residential with new buildings limited to ten floors. Let me cite some statistics here. The property tax has increased yearly an average of 6.6 percent over the last 5 years. That is it went up by 33% between 2021 and 2025, much faster than the official inflation rate. The city budget increased by 50 % over the same time period, but the spending went up even faster which meant higher and higher deficits, a disaster for us left holding the bag. Clearly, there is no limit to the city's appetite for money. Bigger budgets are looked upon as a sign of success on the CV's of the city council members and mayors but they are disastrous For us, it is obvious that no level of densification will eliminate the deficits. Densification will not slow the increase in our taxes either. All it will do is to degrade our quality of life and drive us out of our own homes to be replaced by transients. This real estate scam (the city collects more taxes while driving home prices up) has to stop, it is destroying the city …and the country. Planting a tower on Barclay street deep in a residential area, whether commercial or residential, that breaks the current zoning in the area is meant to make a breach in current bylaws and open the floodgate for similar projects. We know who profits from that and it is not the residents here. We already have an example of these projects, the mini-Junga building under construction at the South West corner of Denman and Alberni. A 22 floor building that has been under construction for 2 years and projected to take another 2 years. Apartments range from 2.5 to over 5 million dollars. The average salary in Vancouver in 2025 is less that 72,500 dollars per year. So it is not difficult to guess who will be buying these apartments and the source of their money. For the city, it is more money per square foot and possibly higher taxes since the buyers will be most likely be not permanent residents or citizens of this country. To make matters worse, the building is partly financed by a foreign bank. And us, what do we get? During years of constructions, more heavy equipment traffic, constant noise, street closures and nothing else. In the long term, more traffic, tourist buses and a transient population that does not give a hoot about peace and quiet the neighborhood. It will draw the homeless deeper into our area and cost us in our sleep and quality of life. We are the tax payers and we are the year-round residents who gives the neighborhood its vitality contrary to what the city is claiming that gentrification of our area will "revitalize" it. Whether another hotel (there is the coast hotel on Denman) is needed is not the issue, there is no need to change the zoning in our area when there are locations closer to transportation hubs that are already zoned for towers. The city council members are safely tucked in their quiet neighborhood away from the densification they are pushing on us. We can't accept that. We have a different vision for our neighborhood. No towers for temporary or permanent residents. We welcome simple buildings that conform with the current zoning. Buildings designed for middle class families with average incomes. We want homes for people who want to work and live here for a long time to make our neighborhood a community, not an overpriced transient camp. Thank you. 2026-02-19	07:05	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	We oppose the rezoning of 2030 Barclay and know that this phony "community support" is a sham hxxps://cityhallwatch[.]wordpress[.]com/2026/02/17/renter-lobbyist-case-study-industry-influence-25-storey-hotel-2030-barclay/	Anita Boomer	West End	
2026-02-19	07:20	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Dear Mayor and Council, I am writing as a nearby resident to respectfully oppose the proposed rezoning for a 25 storey hotel at 2030 Barclay Street. This application requires a site specific amendment to the Zoning and Development By-law and should therefore demonstrate clear consistency with adopted City policy, including the West End Community Plan. These frameworks are intended to guide context appropriate growth and safeguard the stability of established residential neighbourhoods. A large scale commercial hotel on an interior residential block appears inconsistent with these objectives and may set an unintended precedent that weakens confidence in the City's planning framework as enabled under the Vancouver Charter. In addition, a development of this scale would reasonably be expected to increase service vehicle movements, passenger loading activity, and late evening operations on surrounding local streets that were designed primarily for residential use. These potential impacts merit careful scrutiny in Council's evaluation of whether the proposal represents appropriate land use for this location. Finally, the site's proximity to Stanley Park and the documented Great Blue Heron nesting colony monitored by Stanley Park Ecology Society underscores the need for a rigorous, transparent environmental and construction impact assessment prior to consideration of approval. For these reasons, I respectfully request that Council vote no to this application. Sincerely, Kat Kozak	Kat Kozak	West End	
2026-02-19	07:30	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	This proposal conflicts with the RM-5B zoning bylaw, the West End Community Plan and policies for hotels on commercial streets throughout the city.	Rob Grant	West End	Appendix D
2026-02-19	07:32	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Sorry I could not write before the deadline, I was ill. Please do not rezone 2030 Barclay Street in the West End. The West End is one of the best places where to live in all of North America. It is safe (Vancouver police say they rarely see problems west of Denman). It is walking distance from Stanley Park, English Bay, Coal Harbor, and all the services of a nice modern city like Vancouver. My husband and I have been living at the same West End address s.22(1) Personal and for almost 24 years and we are grateful for this wonderful, safe and environmentally conscious place. Please, please do not change our home, we adore it the way it is. Kind regards, Michelle Lambert	Michelle Lambert	West End

CD-1 Rezoning: 2028-2038 Barclay Street - Oppose

Date Received	Time Created	Subject	Position	Content	Author Name	Neighborhood	Attachment
2026-02-19	08:42	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	I oppose the proposed change to rezone the area for a number of reasons: the proposed 270 room hotel is out of scale for a quiet low rise residential neighbourhood and threatens the character of the. neighbourhood; the proposed project will increase traffic including taxis, tour buses and ride-shares on already busy narrow streets with increased congestion and noise and will tax existing infrastracture -- noise garbage and pedestrian safety	Karen Cardiff	West End	
2026-02-19	09:14	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	This does nothing to improve the neighbourhood. It will add extra traffic and noise that the community cannot handle. It will stick out like a sore thumb. The building plan is too much for the site itself.	Ashton Paradis	West End	
2026-02-19	09:16	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Our city is becoming unrecognizable. The sky views and view corridors of the North Shore mountains are disappearing . The noise volume of construction is overpowering. Neighbourhood charm is being neglected. This is all happening so quickly it is dismaying in a very unique city. Infrastructure projects are also proliferating adding to a disruptive soundscape. The original 10 storey proposal was better because it adhered to the character of this neighbourhood. The new proposal of a 25 storey hotel will not enhance the already beautiful skyline and is actually a preposterous proposition. I absolutely oppose the changing of the bylaws.	Elizabeth Ross	West End	
2026-02-19	09:22	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	I am so proud of the neighbourhood group that has been standing at the corner of Nelson and Denman for weeks protesting this inappropriate oversized building that predictably serves the rich and has no regard for the families that live here. I can't believe this building would be considered on a narrow residential street. Then to add retail space is just so disrespectful. The traffic, the constant turnover of people in and out of the hotel, the added noise, parking. This neighbourhood now has so many young families with children. It really is a beautiful safe diverse community. Please consider them over tourists. Please reconsider options that reflect the nature of this beautiful street. I am very very opposed to this project. The construction alone would be unbearable for those who live on the street. Please, please do not proceed. Thanks for the opportunity to provide feedback as this neighbourhood means so much to all of us. Our world is now so noisy and busy. Please save our peaceful oasis. I was planning to come to the meeting but it was such short notice it wasn't possible	Susan Snow	West End	

CD-1 Rezoning: 2028-2038 Barclay Street - Oppose

Date Received	Time Created	Subject	Position	Content	Author Name	Neighborhood	Attachment
2026-02-19	09:57	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	The proposed 25-storey hotel at 2030 Barclay Street—located directly adjacent to Stanley Park and the Lost Lagoon area—could have several ecological impacts on local rare and sensitive bird species that inhabit or nest nearby. Here's a breakdown of likely concerns: 1. Light Pollution Impact: Artificial lighting from the building (especially upper floors and rooftop amenities) can disorient nocturnal and migratory birds, causing collisions or disrupting flight paths. Local concern: Stanley Park is part of a recognized migratory bird corridor; species like the Western Tanager, Varied Thrush, and even rare owl species may be affected. Example: Birds like the Barn Owl and Northern Saw-whet Owl, known to roost in quieter, darker park areas, may avoid this habitat due to increased urban glow. 2. Habitat Disruption Impact: Construction noise and long-term urban use could degrade microhabitats in nearby treetops or underbrush. Species at risk: The Pacific Wren, Hutton's Vireo, and Purple Finch—all sensitive to disturbance—may abandon nesting or foraging areas near the site. Long-term issue: Increased foot traffic, maintenance, and noise from the hotel could deter ground and low-canopy nesters. 3. Collision Risk with Glass Facades Impact: Large glass surfaces—especially on tall buildings—are a major hazard to birds due to reflections of sky or trees. Local risk: During spring and fall migration, species such as Yellow-rumped Warblers, Ruby-crowned Kinglets, and Townsend's Warblers are particularly vulnerable. Mitigation often ignored: If the project lacks bird-safe design (e.g., patterned glass), mortality could be significant. 4. Increased Human Activity & Noise Impact: Elevated visitor density (due to hotel rooms, rooftop bar, restaurant) leads to more disturbances near Stanley Park trails and bird-rich areas. Example: Species such as the Pileated Woodpecker and Cooper's Hawk, which rely on quiet territories, may retreat farther into the park or decline locally. Conclusion The tower's location poses a serious ecological edge-effect on a biodiversity hotspot. Without strong bird-safe building practices, setback regulations, and lighting controls, the development could cause declines in rare or sensitive bird populations that are otherwise thriving just steps away in Stanley Park.	Tempers Joule	Grandview-Woodland	
2026-02-19	10:16	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Concerned about increased traffic on Barclay, disruption to Stanley Park traffic flow, the height of the proposed hotel, the inclusion of a major hotel in a residential area.	James (Jim) Harcott	West End	

2026-02-19	11:15	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	My husband Robert Maxwell and I Heather Driver residents of s.22(1) Personal and Confidential oppose the Barclay re-zoning application for the hotel. However should it proceed please consider the background and recommendations below into account: -we sympathize with Council's plight because provincial legislation encourages development and may override some of your previous authorities, -however Council still has a strong duty and commensurate authorities to strenuously act to protect affected neighbourhoods and individuals' residences, and the Park, -this proposal includes plans to dig 5 storeys down into sand and clay very very near an already rising ocean, countless multi residential buildings and the increasingly fragile Stanley Park, which is already undergoing a water system expansion, -developers probably haven't had experience or knowledge of what will happen when they launch a development of this scale in such a environmentally sensitive and historically significant residential neighbourhood, -we have lived through a smaller development in Toronto very near Lake Ontario, adjacent to High Park in very similar circumstances, -in our sad experience, without proper precautions taken, nearby properties were damaged and some condemned by digging into soft, sensitive, sandy soil, -and even more sadly it largely fell to individual residents to sue the developer afterwards, -preventively the City could have pursued measures for a financial surety to offset potential damage for nearby residential properties AND the Park, -and the City could have asked for proof that the developer had undertaken studies and made plans to prevent seismic damage to surrounding properties before re-zoning and development took place, -that didn't happen in Toronto and that is what I am asking the City of Vancouver along with support of the Park Board to do today. -for clarity this rezoning application should not go forward UNTIL/OR BEFORE the City and the Park obtain the following from the prospective Barclay developer; 1. A reasonable financial surety to cover the cost of potential remediation for prospective damage to local properties especially those south of Barclay, close to rising sea level, and adjacent/close to the Park, and 2. The City and/or the Park Board undertakes a study, at the Developer's expense, to determine whether and how a 65 storey building, with 5 storeys of underground parking can be safely done without causing seismic or other hazards/damage to residential properties, the Park and existing historic commercial properties (e.g. the Sylvia Hotel.)	Heather Anne Driver	West End	
2026-02-19	12:26	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	I oppose the application for the reason, this is a residential area that already has more density than almost any other city in North America. Traffic is already a major issue on Denman street adding a potential 200 plus additional vehicles would create much more havoc in an area that already so densely populated. The Revival hotel by Sonder has 66 rooms and is currently closed due to receivership. The need for 240 plus additional rooms should not be in the heart of a residential area.	Peter Daoussis	West End	
2026-02-19	13:19	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Subject: Urgent Opposition to the Rezoning of 2030 Barclay Street for Hotel Development Dear Members of Vancouver City Council, I am writing as a concerned resident of the West End to strongly urge you to reject the rezoning application for the proposed hotel at 2030 Barclay Street. This development, which seeks to erect a 25-storey tower with 248 rooms on a quiet residential street, represents a profound threat to the livability, environmental integrity, and community character of our neighborhood. While the city's recent Hotel Development Policy aims to address a purported shortage of hotel rooms, the evidence suggests this narrative is overstated, and approving this project would prioritize short-term economic gains over the long-term well-being of residents and our urban ecosystem.	Quille Kaddon	West End	

First, the claim of a critical hotel room shortage in Vancouver warrants scrutiny. The city currently has approximately 13,000 rooms—roughly the same number as in 2002—despite population and tourism growth. High occupancy rates (around 78.4%) and elevated prices (averaging $422 per night downtown in peak seasons) are not indicative of a genuine market failure but rather the result of policy choices and the unchecked expansion of short-term rentals like Airbnb. These platforms have diverted housing stock from long-term residents, creating artificial scarcity. During major events such as the 2026 FIFA World Cup, experts have called for temporary easing of short-term rental regulations to boost inventory without resorting to permanent, invasive constructions. Rushing to build more hotels, especially in sensitive residential areas, ignores these viable alternatives and risks exacerbating overtourism, which strains infrastructure, increases pollution, and diminishes quality of life for locals.

The 2030 Barclay project exemplifies these risks. Situated on a narrow, tree-lined street surrounded by low- and mid-rise apartments, the proposed 289-foot tower would exceed zoning limits by nearly 50% (surpassing the 190-foot allowance) and provide 450% more floor space than permitted under RM-5B zoning and the West End Community Development Plan. This violation sets a dangerous precedent, potentially opening the door to unchecked high-rise developments that erode the protections safeguarding our residential neighborhoods.

The environmental impacts are particularly alarming. The site lies within the 260-meter development buffer zone and 1,000-meter excessive noise zone for the Stanley Park heron colony—one of North America's largest urban heron nesting sites, established since 2001. Construction cranes and the towering structure could disrupt nesting behaviors, leading to colony abandonment, as herons are unaccustomed to overhead activity despite tolerating ground-level human presence. Vancouver's reputation as a green city is at stake; overtourism and overdevelopment already contribute to degraded air quality, reduced visibility, and strained natural resources, as highlighted in studies on British Columbia's tourism perceptions.

Furthermore, the project would intensify traffic and safety concerns in an already congested area. With 248 rooms, it would introduce a surge of tour buses, taxis, ride-shares, deliveries, and daily truck traffic for supplies and waste, gridlocking streets like Robson and Denman. This poses significant risks to pedestrians, including children during school hours, and would transform our peaceful residential lane into a noisy commercial hub. Compounding these issues, the West End west of Denman is identified in the City's November 2024 Seismic Risk Report as the area with the highest earthquake vulnerability. The tower's substantial weight and four levels of underground parking could compromise the structural integrity of adjacent older buildings, a risk conspicuously omitted from the rezoning application.

Privacy and quiet enjoyment for nearby residents would also be severely undermined. The scale of the tower, combined with an outdoor restaurant patio and rooftop pool serving food and liquor, would generate ongoing noise and overlook into homes, disrupting the tranquility that defines our community. In a city facing a severe housing affordability crisis, finite land like this site—previously approved for a 10-storey condominium that aligned with zoning—should prioritize residential units over tourist accommodations. Recent data underscores this urgency: average asking rents in Vancouver have declined significantly in recent years, with reports indicating drops of around 16.5% over the past three years in many categories, while Greater Vancouver's vacancy rate for purpose-built rentals has climbed to 3.7%—the highest in decades—due to a large influx of new rental supply. This decline is accompanied by a massive oversupply in the condo market, where approximately 2,500 newly built condos sit unsold and empty, roughly double the amount from a year ago, contributing to price drops of up to 20% from recent peaks in some segments. With such an overstock flooding the market and existing housing struggling to find renters or buyers, there is no compelling need to divert valuable land to hotel developments when it could instead

				address the ongoing demand for affordable residential options. Successful community advocacy in the past, such as opposition to changes along the Burrard Corridor and elements of the Broadway Plan, demonstrates that resident voices can influence outcomes when grounded in evidence and a commitment to preserving neighborhood integrity. Letters and campaigns from groups like West End Neighbours have effectively highlighted how deviations from established plans lead to unintended harms, prompting councils to reconsider proposals that favor developers at the expense of livability. I implore you to heed these concerns and reject the rezoning for 2030 Barclay. Instead, focus on sustainable tourism strategies, such as better regulating short-term rentals and emphasizing quality over quantity. By doing so, you will protect the West End's unique character, support environmental stewardship, and ensure Vancouver remains a livable city for all residents. Thank you for your attention to this critical matter. I look forward to your decision that prioritizes our community's future. Sincerely, Quille Kaddon s.22(1) Personal and Confidential Supporting sources (full links provided for easy reference and copying): stop2030barclay.ca/about/ hxxps://dailyhive[.]com/vancouver/vancouver-new-hotel-development-policy-approved hxxps://guidelines[.]vancouver[.]ca/policy-hotel-development.pdf https://vancouver.ca/news-calendar/updated-policy-for-new-hotel-developments-april-2025.aspx hxxps://www[.]ctvnews[.]ca/vancouver/article/west-end-residents-rally-against-proposed-27-storey-hotel-near-stanley-park/ hxxps://www[.]biv[.]com/news/real-estate/calls-grow-to-ease-vancouvers-short-term-rental-rules-ahead-of-fifa-world-cup-11169173 hxxps://clearairbc[.]ca/Documents/visibilty-tourism-mcneill.pdf hxxps://assets[.]simpleviewinc[.]com/simpleview/image/upload/v1/clients/vancouverbc/Destination_Vancouver_Residents_Perceptions_of_Vancouver_s_Tourism_Industry_Infographic_Dec_2023_Updated_1__5e6655d6-2258-48c4-b8c3-0a840a5d9e6e.pdf (Note: The rental and condo market data referenced above is drawn from recent reports by sources such as Rentals.ca, CMHC, and local real estate analyses published in 2025–2026, including coverage in Vancouver Sun, Globe and Mail, and industry trackers like Zumper and Rentals.ca trend reports.)			
2026-02-19	13:42	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	Subject: Strong Opposition to the Rezoning Application for 2030 Barclay Street – Prioritizing Residents Over Hotel Expansion Dear Members of Vancouver City Council, My name is Ron Bruce, and I am a West End resident. I am deeply concerned about the proposed rezoning and development of a 25-storey, 248-room hotel at 2030 Barclay Street. This project would set a harmful precedent for residential neighbourhoods across the city, undermine environmental protections, and divert scarce land away from much-needed	Ron Bruce	West End	

housing at a time when Vancouver's rental and ownership markets are showing clear signs of oversupply.

The City's April 2025 Hotel Development Policy promotes accelerated hotel construction in response to claims of a severe room shortage. However, this rationale appears overstated. Vancouver still maintains roughly 13,000 hotel rooms—approximately the same number as in 2002—despite significant population and tourism growth. Reported high occupancy (around 78.4%) and peak-season rates (averaging $422 per night downtown) stem largely from municipal policy decisions over the years and the widespread conversion of long-term housing into short-term rentals through platforms like Airbnb. Rather than building new hotels in established residential areas, more balanced solutions—such as temporarily relaxing short-term rental restrictions during high-demand events like the 2026 FIFA World Cup—could increase available inventory without permanent, high-impact construction.

The 2030 Barclay proposal is particularly troubling. The site, located on a narrow residential street lined with low- and mid-rise apartments, would see a 289-foot tower rise nearly 50% above the 190-foot zoning limit under RM-5B and the West End Community Development Plan. This represents a 450% increase in permitted floor space and would erode long-standing neighbourhood protections that prevent incompatible high-rise development in low-density areas.

Of grave concern is the project's proximity to the Stanley Park heron colony, one of the largest urban heron nesting sites in North America. The site falls within the 260-metre development buffer zone and the 1,000-metre excessive noise zone. The height of the tower and construction activity—including cranes—could severely disrupt nesting behaviour, potentially causing the colony to abandon the site entirely. This would represent a significant loss to Vancouver's urban biodiversity and damage the city's reputation as an environmentally responsible destination.
Additional impacts include intensified traffic on already busy streets such as Robson and Denman, with the addition of tour buses, taxis, ride-shares, deliveries, and waste trucks likely to create congestion and safety hazards for pedestrians, including schoolchildren. The West End west of Denman is also identified in the City's November 2024 Seismic Risk Report as having the highest earthquake vulnerability in Vancouver. A heavy tower with multiple underground parking levels could place added stress on neighbouring older buildings in a seismically sensitive zone—a risk that appears inadequately addressed in the application.

Equally troubling is the broader housing context. Vancouver is currently experiencing a softening rental market, with average asking rents declining significantly in recent years (reports indicate drops of around 16.5% over the past three years in many categories) and purpose-built rental vacancy rates in Greater Vancouver reaching 3.7%—the highest level in decades—due to a large wave of new supply. At the same time, the condominium market faces a substantial oversupply, with roughly 2,500 newly completed units sitting unsold and empty—approximately double the number from a year earlier—contributing to price reductions of up to 20% from recent peaks in certain segments. In light of this clear oversupply of both rental and ownership housing, it is difficult to justify converting a site previously approved for residential condominiums into yet another hotel when land is finite and residential affordability remains a pressing city-wide priority.
Past resident-led advocacy—such as successful pushback against inappropriate density along the Burrard Corridor and elements of the Broadway Plan—has shown that well-reasoned, evidence-based opposition can protect neighbourhood character and livability. I respectfully ask Council to apply the same careful consideration here and reject the rezoning for 2030 Barclay Street.

Vancouver deserves tourism policies that are sustainable and equitable, not developments that sacrifice residential integrity, wildlife habitat, seismic safety, and housing priorities for short-term gains. I urge you to refuse this rezoning and instead pursue strategies—such as

				stronger short-term rental regulation—that better balance tourism with the needs of long-term residents across all neighbourhoods. Thank you for your attention to this important matter. I look forward to a decision that places the well-being of Vancouver residents first. Sincerely, Ron Bruce s.22(1) Personal and Confidential Supporting sources: hxxps://stop2030barclay[.]ca/about/ hxxps://dailyhive[.]com/vancouver/vancouver-new-hotel-development-policy-approved hxxps://guidelines[.]vancouver[.]ca/policy-hotel-development.pdf https://vancouver.ca/news-calendar/updated-policy-for-new-hotel-developments-april-2025.aspx hxxps://www[.]ctvnews[.]ca/vancouver/article/west-end-residents-rally-against-proposed-27-storey-hotel-near-stanley-park/ hxxps://www[.]biv[.]com/news/real-estate/calls-grow-to-ease-vancouvers-short-term-rental-rules-ahead-of-fifa-world-cup-11169173 hxxps://clearairbc[.]ca/Documents/visibilty-tourism-mcneill.pdf hxxps://assets[.]simpleviewinc[.]com/simpleview/image/upload/v1/clients/vancouverbc/Destination_Vancouver_Residents_Perceptions_of_Vancouver_s_Tourism_Industry_Infographic_Dec_2023_Updated_1__5e6655d6-2258-48c4-b8c3-0a840a5d9e6e.pdf (Note: Rental and condo market figures are based on recent 2025–2026 reports from CMHC, Rentals.ca, Zumper, and local media coverage including Vancouver Sun and The Globe and Mail.)			
2026-02-19	14:12	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	ear Vancouver City Council Members, Subject: Please Say No to the Huge Hotel Tower at 2030 Barclay Street I'm a longtime West End resident—been here over 20 years—and I'm really worried about this proposal to rezone 2030 Barclay Street for a big 25-storey hotel with 248 rooms. Our street is peaceful, lined with trees and mostly low- to mid-rise apartments, and jamming in a massive tower like this would completely change everything we love about living here. It is already so hard to get parking that my family members refuse to visit me here in my neighbourhood. We used to enjoy going swimming at the Stanley Park pool, and going for walks in Stanley Park. The city keeps saying we desperately need more hotel rooms, but I think they're exaggerating the problem to push developments like this in order to grab more tax revenue. Sure, occupancy is high at around 78% last year and rates are steep, but a lot of that comes from all the short-term rentals that were yanked off the market. Why is it that for some big events like the upcoming 2026 FIFA World Cup, they are able to suggest just loosening rules on those Airbnbs temporarily instead of making them permanent and integrated throughout this residential area? That seems smarter and less destructive.	Merridith Porter	West End	

				This spot is right near Stanley Park, and the heron colony there—one of the biggest in urban North America—has been going strong since 2001 and is now in its 26th year with lots of healthy nests and chicks this season. A tall building and construction cranes overhead could scare them off for good; herons don't handle that kind of disruption well, even if they're okay with people on the ground. We can't risk losing that natural treasure when there are so few locations for wildlife to have their families and raise their chicks for the future —Vancouver's "green city" bureaucracy should take a real hit for that selfishness. The height is way out of line too—289 feet when zoning only allows about 190, blowing past the West End plan by a huge margin. It sets a bad example for more out-of-scale projects everywhere. Traffic will be insane with all the construction vehicles, workers, destruction, reconstruction and later buses, deliveries, taxis, and garbage trucks for 248 rooms turning our quiet lane into a commercial zone. Pedestrians, especially kids heading to school, would be at risk, and with our area flagged as super vulnerable in the latest seismic report, a heavy tower with underground parking could shake up the older buildings next door. Plus, the noise from an outdoor restaurant patio and rooftop pool (with food and drinks) would ruin the peace we count on—constant chatter, music, and lights shining into our windows late at night. Past community pushback has worked before, like along Burrard or parts of the Broadway Plan, when residents show up with solid points. Groups like West End Neighbours have made a difference by reminding council that straying from the plans hurts everyone in the long run. We, the Residents of the West End made long term plans, purchased properties and chose to live here based on your previously published plans! What gives you the right to change the goal posts and leave us to pick up the pieces! Please listen to us locals and vote no on this rezoning. Let's focus on better ways to handle tourism—like permitting short-term rentals—without wrecking our neighborhood's character and environment. Thanks for taking the time to read this. I hope you'll choose to keep the West End livable for the people who call it home. Sincerely, Merridith Porter West End Resident			
2026-02-19	14:39	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	The area plan for this part of West End should not be tossed aside and overridden by the city's hotel policy. It's crazy that a massive hotel is being proposed in this area anyway. Local area residents don't want it. Please reject this proposal!	Michelle Travis	Hastings-Sunrise	
2026-02-19	14:48	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	We oppose this proposed rezoning and hotel, as the congestion and traffic it would create – in addition to the disproportionately massive size of the building project – would be very harmful to this community and to our small residential neighbourhood.	Mary Tahan	West End

CD-1 Rezoning: 2028-2038 Barclay Street - Oppose

Date Received	Time Created	Subject	Position	Content	Author Name	Neighborhood	Attachment
2026-02-19	15:28	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	I have lived in the West End for over 20 years. It's a wonderful neighbourhood. Like all neighbourhoods, it has undergone changes overtime. This is natural and for the most part understandable. However, some changes are simply not acceptable. The proposed hotel tower at 2030 Barclay Street is such a case. The towers height and size would exceed current zoning rules, and is completely incompatible for a small lot situated so close to beautiful Stanley Park and the larger community in general. The tower would bring big-city noise and traffic to an area already overwhelmed with vehicles backed up from the Burrard Bridge onto Beach, Denman and Georgia Streets heading to and from the Lions Gate Bridge. On the weekends in particular, the traffic can come to a standstill due to the sheer number of vehicles accessing these roads. We need housing in our quiet residential neighbourhood, not hotels for tourists.	Shannon Lange	West End	
2026-02-19	15:44	CD-1 Rezoning: 2028-2038 Barclay Street	Oppose	OPPOSE COMPLETELY This UNIQUE enclave west of Denman street needs to be protected against increased noise and traffic. It is a walking community that hugs up against the park and the wildlife that call it home. More traffic and nightlife can’t be allowed. It is unique in the world, a gem vancouver is proud of - more retail and a hotel space will fatally erode the neighborhood. Go somewhere else!	Mairzee Almas	West End	

APPENDIX A

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

1:

We, the undersigned Vancouver residents and supporters of the West End, call on The Honourable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft) and 12.75 FSR (four times the allowed density).

This project adds no housing and conflicts with:
(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitors' vehicles, and infringe on residents' right to quiet enjoyment — while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on The Honourable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft) and 12.75 FSR (four times the allowed density).

This project adds no housing and conflicts with:
(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitors' vehicles, and infringe on residents' right to quiet enjoyment — while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

(18)

We, the undersigned Vancouver residents and supporters of the West End, call on The Honourable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft) and 12.75 FSR (four times the allowed density).

This project adds no housing and conflicts with:
(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitors' vehicles, and infringe on residents' right to quiet enjoyment — while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).

This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).

This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development:

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

PETITION TO REJECT 2030 BARCLAY HOTEL PROPOSAL

We, the undersigned Vancouver residents and supporters of the West End, call on the Honorable Mayor and Council, City of Vancouver to reject the rezoning (file number: RZ-2024-00065) of 2030-2038 Barclay Street for a 27-storey, 270-room hotel tower at 88 m (289 ft.) and 12.75 FSR (four times the allowed density).
This project adds no housing and conflicts with:

(1) West End Community Plan: New development must fit the neighbourhood's character, maintain a primarily 6 storey scale, and prioritize active and public transit.
(2) West End RM Guidelines: Required tower separation.
(3) Council's Hotel Development Policy: 3.5 FSR (density), six-storey, 22 m. limits.

Allowing it would harm livability, worsen traffic on narrow streets with large service trucks and visitor's vehicles, and infringe on residents' right to quiet enjoyment -while setting a dangerous precedent for out-of-scale development.

We urge City Council to uphold zoning rules, respect community plans, and reject this proposal.

2030 Barclay - Hotel Proposal

August 21st, 2025

As illustrated in Figure 1, the West End Community Plan (WECP) refers to two "urban frames" defining the perimeter of the West End. Noted in red is a frame of dense buildings along the Georgia/Alberni and Burrard/Thurlow corridors. New buildings with floor space ratios increasing from 10 FSR to 20 FSR along with increased height towards the downtown core to create a "domed" skyline would occupy this frame while taking development pressure off the interior of the West End.

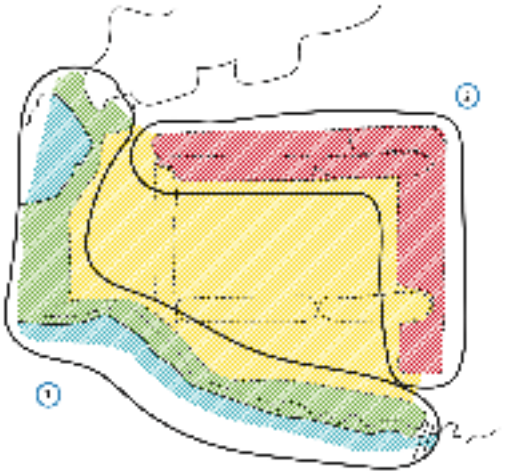

Figure 1 Urban Frame

On the south and west sides of the West End exists a frame defined by the English Bay Waterfront and Stanley Park. In the WECP there is no mention of buildings in this frame. Yet the hotel proponents have invented a building frame along the waterfront as illustrated in Figure 2 by colouring these buildings though there is no discernable difference between this pattern of high, medium and low rise buildings on the "edge" and the high, medium and low rise buildings in interior blocks. The proponents further argue that at Barclay and Lagoon Drive "the edge is more frayed". Fear not West Enders, the "solution" to this shocking oversight can be repaired with a significant tower in the middle of the 2000 block on Barclay.

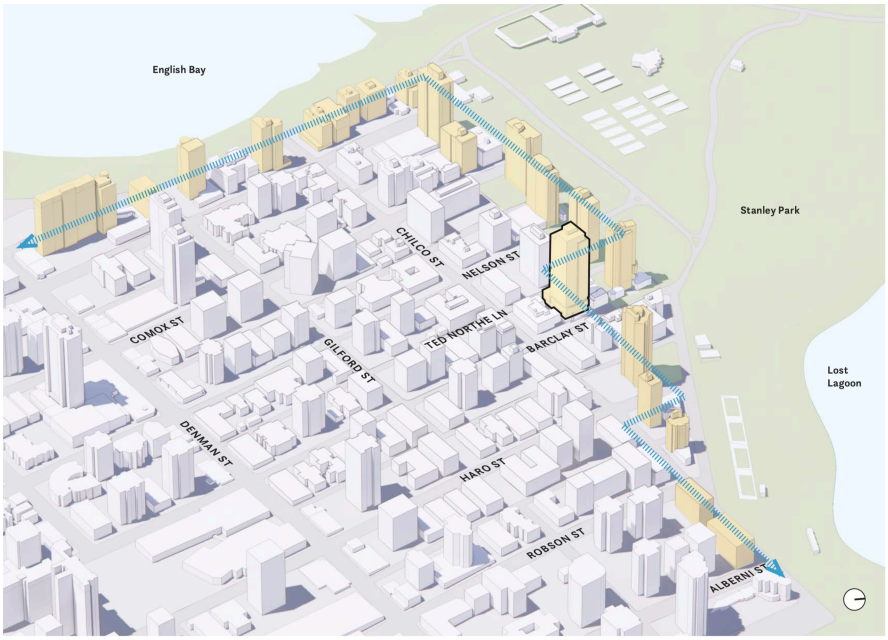

Figure 2 Invented Frame

Figure 3 shows the height and estimated floor space ratios (FSR) of a number of buildings west of Denman. The reality is that there is no significant difference in the varied heights and FSRs of buildings on the edge or the middle of the neighbourhood.

Figure 3 Building Heights and Floor Space Ratios

The proponents ignore the reality that 2030 Barclay is not at the edge but rather mid block. More seriously, while the proposal is the tallest in the neighbourhood by 1 floor, it has by far the highest FSR at 12.75 west of Denman and most likely anywhere in the RM-5B zone. This outrageous density which is more than 4 times the allowable and doesn't even include the "back of house" floor area, is more in line with densities being given to properties along the Georgia/Alberni and Burrard/Thurlow corridors, but completely at odds with the goals of the WECP, which were to preserve the diverse building types in the body of the West End.

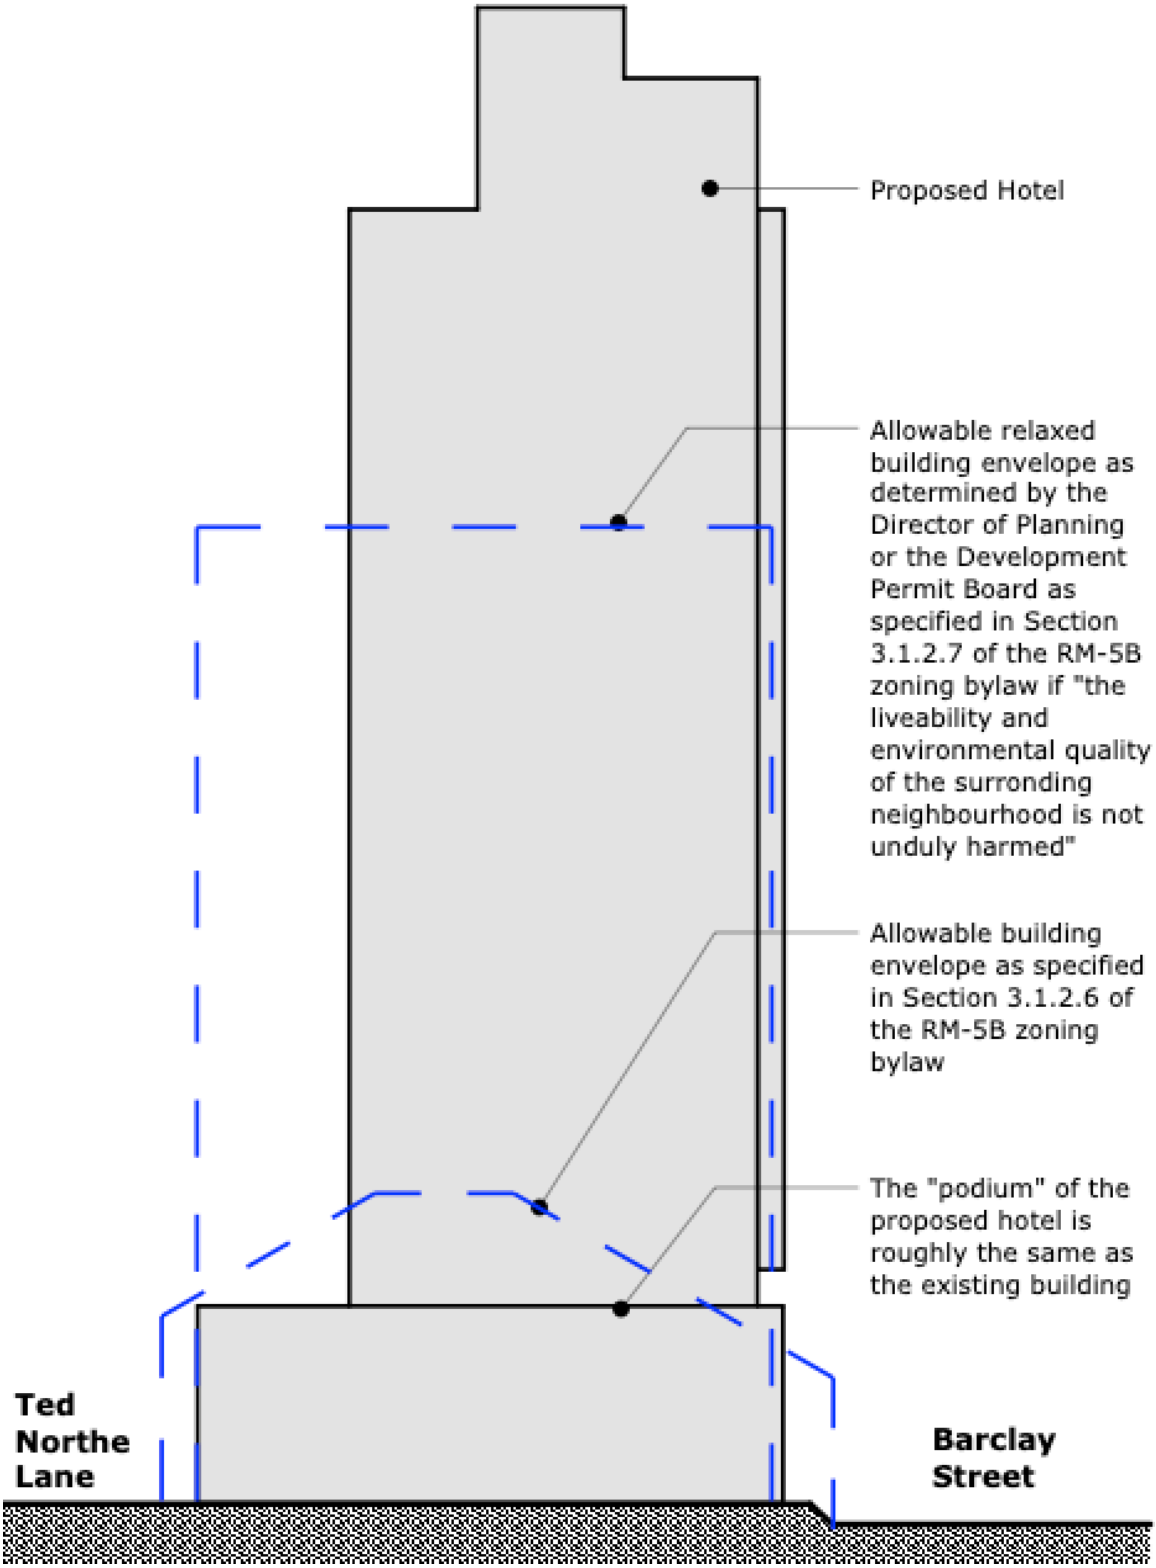

Figure 4 Hotel Proposal and Allowable Building Envelopes for RM-5B

Figure 4 shows the proposal within the context of the building envelope prescribed by the RM-5B zoning district. The taller relaxed height is achievable if the Director of Planning or the Development Permit Board considers: "(a) the intent of this schedule and all applicable Council policies and guidelines; (b) the submission of any advisory group, property owner or tenant; and (c) the impact on public and private views, sunshine, privacy and open spaces." There is no provision within the RM-5B zoning district for a building of the scale being proposed.

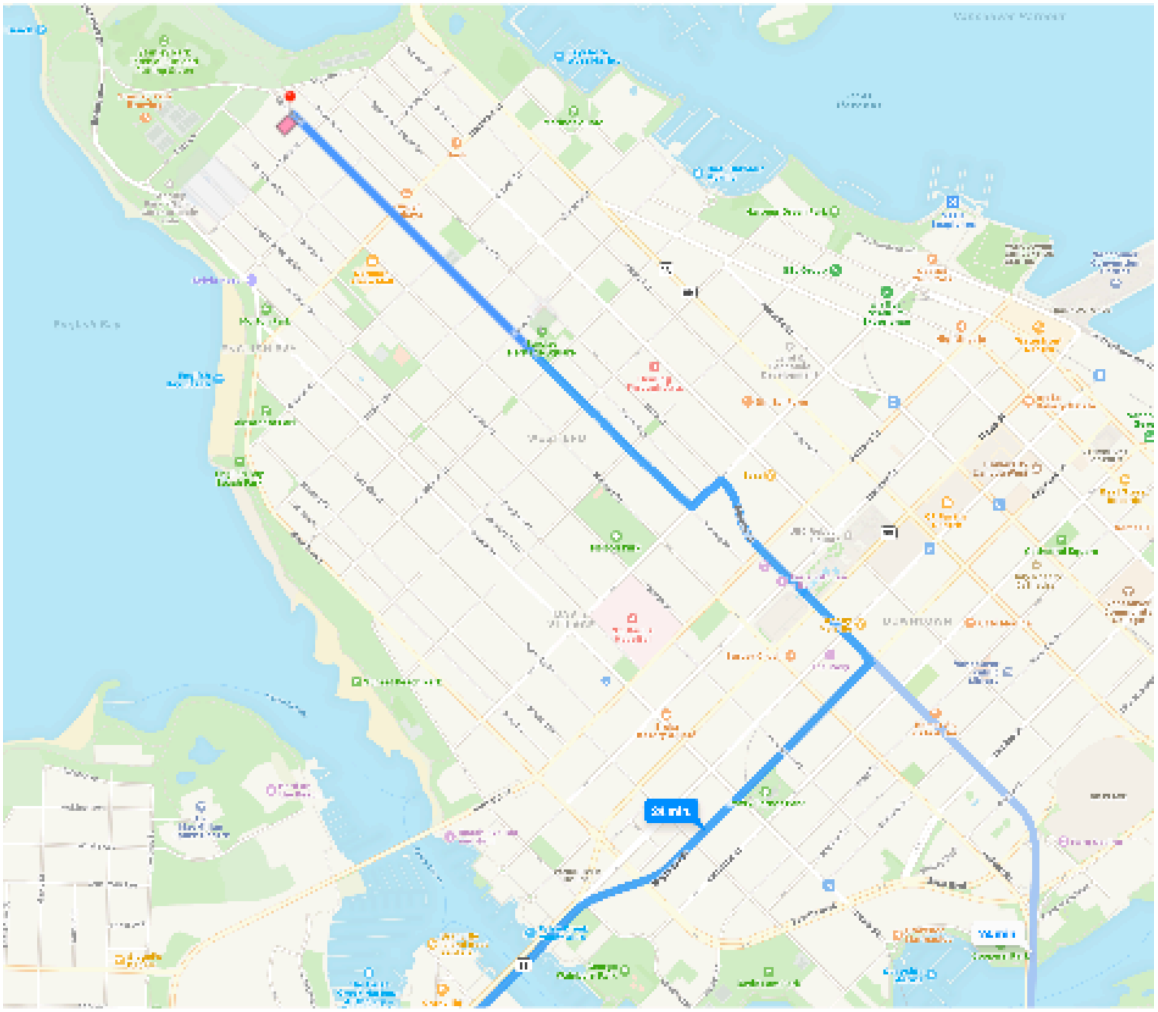

Figure 5 Google Map Directions from Airport to 2030 Barclay

A Google Map directions search from Vancouver International Airport to 2030 Barclay Street shows a route that will likely be used by taxis, Uber drivers and guests in rental cars adding to the already increasing traffic cutting through residential streets of the West End.

Not only will the neighbourhood experience noise from increased traffic, but noise from refrigerated food delivery trucks and increased waste removal vehicles needed by large hotels. City policy for hotels recognizes this while noting that hotels are best located in the CBD or along commercial streets.

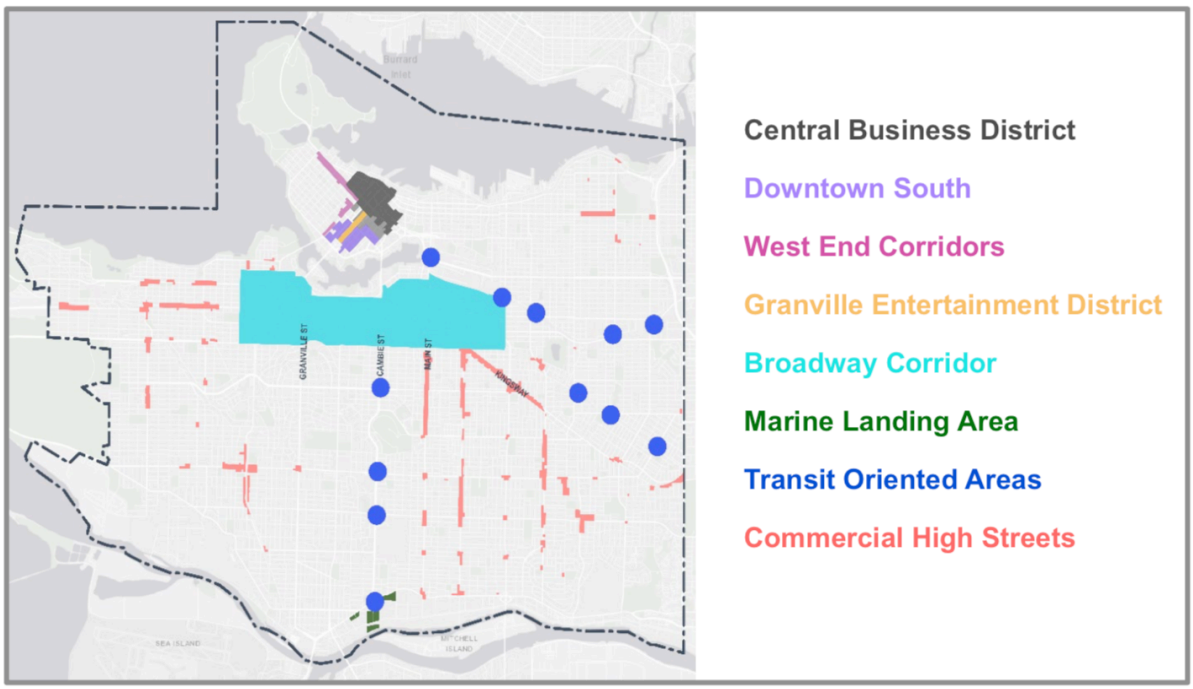

Figure 6 Geography of Existing and Proposed Hotel Rezoning Policies as taken from Hotel Development Policy Update- April 1st, 2025

The most recent document illustrating the geography of existing and proposed hotel rezoning policies as seen in Figure 6, shows only Robson and Burrard streets included in the West End Corridors. Admittedly this omits existing hotels on Davie Street and smaller hotels such as the Sylvia in our neighbourhood as well as the Rosellen Suites, which are the subject of this proposal. That the proponents of this 270-room hotel are calling it a "boutique" hotel begs credulity. This is a significant full service hotel and hotel policy is very specific about not including significant hotels within established residential areas.

In fact a significant hotel, the Empire Landmark, the then tallest building in the West End was dismantled over a two-year period only to be replaced by two luxury condominium towers sitting on 6 levels of underground parking comprising an entire city block. Is the proposed hotel in the middle of a quiet residential neighbourhood a suitable replacement for a more centrally located hotel on a commercial street?

The issue is raised here because it points to a recurring failure of the planning department to take seriously the West End Community Plan and planning principles such as: "Achieve a green, environmentally sustainable pattern", when perfectly good large buildings are torn down after short life spans.

Or "Provide and support a range of sustainable transportation options", when recent developments have been built with increasingly large and deep parking structures which only reinforces car dominance and further traffic congestion not only on our main streets but also negatively impacting formerly quiet residential streets.

Or "Support a range of affordable housing options to meet the diverse needs of the community" when the approval of this proposal will set a new precedent and put even more pressure to redevelop existing affordable housing within the RM-5B district while providing no housing at all.

The proponents of this proposal like many other developers of recent projects in the West End stand to benefit from a significant lift in land value. Some of this is supposed to accrue to the community through Community Amenity Contributions.

There have been many completed luxury buildings in the past few years, yet there is a long list of deferred projects funded by such contributions that have yet to see the light of day. This includes the West End Community Centre upgrade and a new seismically upgraded King George High School to replace the existing overcrowded facility. Figure 7 shows how a hotel could be incorporated into a new West End Community Hub, similar to a proposal for a hotel being incorporated into the Filipino Cultural Centre on Main Street. A hotel at this location would be benefit the restaurants and cafes along Denman street without negatively impacting quieter residential streets.

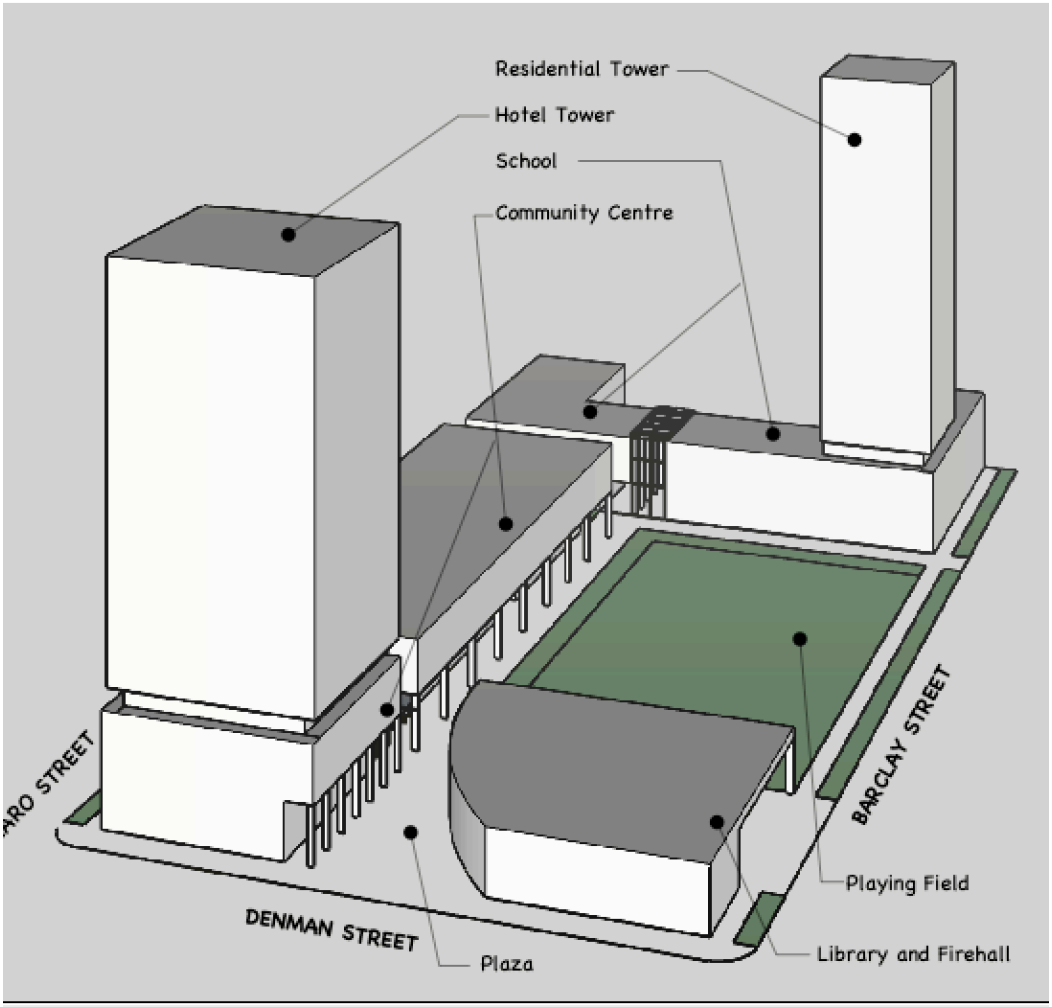

Figure 7 Possible Incorporation of a Hotel into a New West End Community Hub

Specious design rationales about repairing fictional "frayed urban frames" from clever architects and voracious developers seem to have duped the planning department into allowing such an outrageous proposal to get this far in the rezoning process. If this is how they manage the West End Community Plan how are we to take seriously their ability to manage the many changes they have in store for the rest of the city?
