2026-07-21	11:57	Vancouver Official Development Plan and Regional Context Statement Amendments for Former Molson Brewery Site	Support	My name is Danna Garcia and I am the executive director of the South Granville Seniors' Centre in Fairview. We provide meals, drop-in programs and services for over 2,000 local seniors. Many of our members remain physically active and very much enjoy walking and cycling in the area. Therefore, changing the land use on the former Molson brewery site is an action we support. Currently the large concrete structure acts like a barrier to the neighbourhood. Allowing a mix of uses will potentially open up the site to people and activity. I am hoping there will be some future green space and walking paths for our members to use. Thank you for your consideration.	Danna Garcia		
2026-07-21	12:24	Vancouver Official Development Plan and Regional Context Statement Amendments for Former Molson Brewery Site	Support	I love this idea!! It maintains the quieter suburban feel of neighborhoods while addressing the lack of available and affordable homes in Vancouver. It shouldn't be only the millionaires that can afford the cost of single family homes who deserve to live in many of our lovely tree-filled neighborhoods, and high rise buildings aren't the only answer to create more housing (not to mention are less desirable for many individuals including families). This shows that Vancouver is capable of finding a third option, and I support it!	Sarah Walker	Fairview	
2026-07-21	15:35	Vancouver Official Development Plan and Regional Context Statement Amendments for Former Molson Brewery Site	Support	I support redeveloping the former Molson Brewery site, but only if it is planned as part of a coordinated vision with the neighbouring Sənákw development. Although they are under different jurisdictions, both projects will share the same roads, transit, parks, utilities, and public spaces, and should be planned together as one waterfront district. I encourage the City to work with the Squamish Nation and other partners to develop a shared plan for infrastructure, mobility, public amenities, and open spaces. I also encourage a more balanced mix of uses, including employment space and a hotel, to create jobs, support tourism, and build a vibrant neighbourhood rather than one that is primarily residential. This is a once in a generation opportunity to create a complete, resilient, and well connected waterfront district that benefits both current and future generations.	Lin Lou	Fairview
