If we do not experience the benefit of the higher value buildings, why should we experience the downside from the low income housing? I live in the Woodward's building, and it is inappropriate to lower our property value and rental rates due an unfair percentage of low income demographics in our neighborhood	Adelynne Addington	Downtown

So if a 26 story building goes up ,I will loose my view and I will have no more privacy	Andrew Baird	Downtown

Not enough affordable housing. Not enough social housing. Not enough community benefits, for the scale of the project. Projects like this drive up construction costs that should be kept low to build affordable housing, co-op housing, and social housing all over the city. They should fulfill their broken promises first.	Maxim Winther	Mount Pleasant
